knowledge manual

glōminerals philosophy

Skin nurturing makeup for beauty with a higher purpose.

It is glōminerals' belief that good-for-you beauty doesn't have to be basic. Innovative eye, cheek, and lip products are offered in a rich color palette of fashion-forward shades and timeless color classics designed to enhance every complexion. glōminerals' five foundation formula options offer the most comprehensive shade range available, allowing every skin tone to find a perfect match.

Uniquely formulated, utilizing only the finest pharmaceutical-grade ingredients, triple-milled high-pigment minerals, and an advanced antioxidant complex of vitamins A, C, E and green tea extract. glōminerals provides broad-spectrum UV protection and helps to defend against free radical damage, to deliver a radiant, healthy complexion. In addition, glōminerals formulas are talc-free, non-comedogenic and free of perfumes and chemical dyes, making them suitable for even the most sensitive skin types, including those with acne and rosacea.

glōminerals is embraced by dermatologists, plastic surgeons and skincare professionals because it is ideal for use after chemical or laser procedures to help protect and heal the skin and for everyday use to maintain a healthy, luminous complexion and a stunning glō!

glōminerals vs. traditional cosmetics

In an effort to educate our clients on the most advanced ingredients, it is necessary to clarify the difference between glōminerals and the formulations offered in traditional cosmetics. glōminerals foundation differs from traditional foundation in many important ways.

- glōminerals does not contain talc: Talcum powder is generally used as a bulking agent. It allows cosmetic companies to increase the product they get for the pigment they put in. This addition results in a product that has greater oil-absorbing properties, but requires more product to be applied to the skin to achieve the desired coverage.
- The lack of talc in glōminerals means that one can achieve fuller coverage using less product: The makeup feels lighter on the skin, and will last through the day. The product will last longer than a comparable talc-containing product.
- Products that contain talc can have adverse effects: A talc particle is heavier than a mineral pigment and will settle into both pores and wrinkles. Therefore, products containing talc are more likely to accentuate wrinkles and clog pores.
- Talc may also exacerbate skin conditions like acne and rosacea: Skin irritation may occur with the use of products containing talc, especially on sensitive skin types.
- glōminerals products are beneficial for all skin types and conditions: glōminerals lies on top of the skin's surface, evening out complexions without accentuating imperfections.
- glōminerals allows the skin to breathe: Unlike traditional makeup products, glōminerals is not occlusive on the skin. It does not cover and conceal the skin like a lid, but rather lies on the skin like scales on a fish. This creates a porous layer which allows the skin to breathe and function normally while wearing glōminerals.

beauty with a higher purpose

selecting the right foundation: coverage, finish & formula

The first step in choosing a proper foundation is to familiarize yourself with the three properties of foundation: coverage, finish & formula.

coverage

Coverage is the degree to which foundation is applied. To select the proper level of coverage, first assess the client's skin. Choose the level of coverage that conceals all afflictions with the least amount of coverage possible. There are 3 levels of coverage:

Sheer: For clear or slightly flawed skin

Medium: For skin with mid-range afflictions

Full: For complexions with major afflictions

finish

Finish is the look the foundation has on the skin. There are three finishes possible:

- **matte:** No sheen or shine on the face
- **semi-matte:** Sheen on high points of face
- **dewy:** High shine or shimmer on face

formula

Formula is the form of the foundation. glōminerals offers four formulas:

- **glōPressed base:** A finely pressed powder suitable to use as both a foundation and setting powder.
 - Coverage ranges from sheer to full
 - Offers a semi-matte finish
 - Recommended for all skin types, especially oily

- **glōLoose base:** A versatile loose powder foundation.
 - Coverage ranges from medium to full
 - Offers a dewy finish
 - Recommended for all skin types, best for sensitive skin

- **glōProtective liquid foundation:** A liquid cream formulation available in two finishes.

Satin II

- Coverage ranges from sheer to full
- Offers a satin finish
- Recommended for all skin types except oily, better on less sensitive and dry skin

Matte II

- Coverage ranges from sheer to full
- Offers a matte finish
- Recommended for oily skin types

- **glōSheer tint foundation:** A sheer, smooth liquid formulation.
 - Sheer coverage
 - Offers a dewy finish
 - Recommended for skin needing little coverage and dry skin
 - Can be layered with powder for color balancing, increased coverage and a more matte finish

additional options

- **glōMatte finishing powder:** Made primarily from rice starch, this powder offers a matte finish with a minor tint to balance color.
- **glōPerfecting powder:** This clay-based formulation offers a truly translucent matte finish that absorbs excess oil.
- **glōFace primer:** Create your own perfect canvas with glōFace primer. This clear gel glides on giving a smooth, more uniform surface by filling in fine lines and imperfections to create a flawless appearance before foundation application.

foundation matching

When matching foundation, an artist must first determine undertone and identify any surface tones.

- **Undertone:** The color of one's skin created by both melanin and blood under skin. Undertone designation does not change, only the value may change. (i.e. If an individual has an olive undertone, she will be olive for life.)
- **Value:** How light or dark a color is. Depending on age or exposure to the sun, one may appear darker or lighter.
- **Surface tone:** Varying color on the surface of the skin (redness, hypo/hyperpigmentation, etc.)

identifying undertone

One can possess either a warm or a cool undertone.

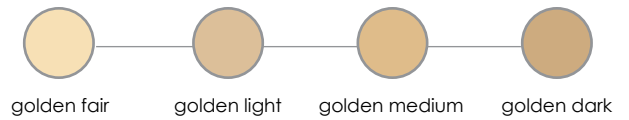

- **Warm Undertones:** Warm, Olive (yellow/green), Peach
 - Make up 97% of the population, 80% of which are yellow or olive.
 - Peach undertones generally result from yellow undertone with red surface tones.
- **Cool Undertones:** Pink
 - Cool undertones occur in only 3% of the population.
 - Frequently found in individuals that have extremely low pigmentation.
 - A result of blood rather than pigment.

undertone & appropriate glōminerals foundation

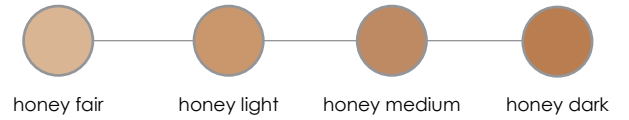

golden

- yellow or olive undertone (fair to medium complexions)

honey

- yellow or olive undertone (medium to deep complexions)

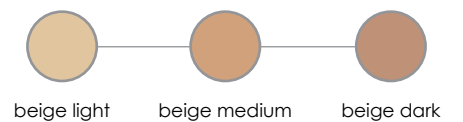

natural

- peach or yellow undertone (fair to medium complexions)

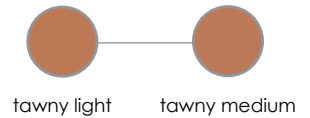

beige

- pink or peach undertone (medium to deep complexions)

tawny

- deep peach undertone (deep complexions)

chestnut

- deep yellow or olive undertone (deep complexions)

cocoa

- deep olive undertone with golden, red or blue-black (very deep complexions)

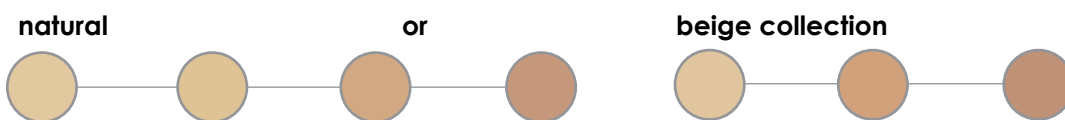

incorporating surface tones

Surface tones, if excessive, can either be incorporated into one's undertone, or eliminated with concealer or full coverage foundation. However, an artist should only use full coverage when it is absolutely necessary.

Rule of thumb: Go as sheer as possible as long as one gets the coverage needed.

Yellow / Olive undertones with red surface tones = peach foundation

Yellow / Olive undertone with golden surface tones = golden / yellow foundation

Yellow / Olive undertone with red and golden surface tones = warm peach foundation

incorporating red surface tones

Red surface tones are common among women of all ages. Troubleshooting involves adding red to the undertone color. This usually results in a peach color, which will naturally soften the red.

Rule of thumb: A little color on the cheeks is OK. If the red falls in a desirable place, don't eliminate it.

incorporating hypo/hyperpigmentation

- **Hypopigmentation:** Areas on the skin possessing less pigmentation. Appears lighter than the surrounding skin.
 - Hypopigmentation in small areas is of little worry
 - Larger areas can be addressed with concealer or full coverage
- **Hyperpigmentation:** Areas on the skin possessing more pigmentation. Appears darker than the surrounding skin.
 - More commonly known as freckles or birthmarks
 - Can be a large or small issue depending on the density of pigmentation
 - If there are a number of freckles, the color and value of the freckle must be incorporated into the foundation color
 - Freckles generally have a golden brown color - darker values or golden yellows work well to incorporate freckles
 - Intense hyperpigmentation can be addressed with concealer or full coverage

warming & cooling

Balancing color with powder & bronzer

With millions of color variations of skin tone in the world, it is sometimes necessary to mix colors to achieve a better color fit. One can either mix two powders or mix a pressed powder and a liquid.

- When to warm-up a foundation: If after a foundation application you find the face either too pale, grey or splotchy, you may need to add a warm powder. To do this, one can either add a powder one or two shades darker or use bronzer.
- When to cool a foundation: If after a foundation application, you find the face either too orange or yellow, you may need to add a cooler powder. Your best option is to dust the face with a value of the beige family.

color matching between foundation formulas

glōPressed powders differ from glōLoose powders because they contain binders to "press" the minerals together. These binding ingredients are benign and do not alter the effectiveness of the makeup or react any more or any less to skin afflictions. They do, however, alter color just slightly.

- If you are transitioning from a glōLoose powder to a glōPressed powder, select the appropriate color family in one shade darker.
 - i.e. glōLoose powder in golden medium might be glōPressed base in golden dark.
- If you are transitioning from the glōPressed powder to the glōLoose powder, select the appropriate color family in one shade lighter.
 - i.e. glōPressed base in natural medium might be glōLoose powder in natural light.

color matching & technique

The best places to test a foundation are the neck and jaw-line.

Frequently, one's face does not match one's neck. An artist should never emphasize the difference. Instead, an artist should select a color that bridges the difference. If done properly, the client will never have a "foundation mask."

well blended

poorly blended

concealing 101

concealing formulas

glōConcealer - under eye:

- A creamy formula containing two color tones
- Ideal for the under-eye area as it covers without caking
- The two color tones allow one to customize a color for one's own skin tone

glōCamouflage oil-free:

- Drier, one-color formula
- Ideal for covering blemishes, larger areas or spots of dark pigmentation

glōBlemish stick:

- Dry formulation in a pen-like application
- Formulated to adhere to the transitional and sensitive acneic skin
- Contains salicylic acid for added acne treatment benefits

concealers can be used in two ways

Cover up:

- Concealer is applied in a color lighter or the same color as the skin to cover up the undesirable feature.

Color Theory:

- Use complementary colors (color theory) to hide or alter unwanted facial features.
- Draw attention to positive features and conceal less-desirable features.

Skin Issue	Color of Skin Issue	glōminerals color option
blemish	red, red-violet	glōCamouflage: natural or beige glōBlemish stick: light or medium
red cheeks	red, pink	glōConcealer: beige glōCamouflage: natural
under eye circles	red-violet	glōConcealer: golden glōCamouflage: golden or natural
under eye circles	blue-violet	glōConcealer: golden or natural glōCamouflage: natural
under eye circles	blue-brown	glōConcealer: honey
veins	blue	glōConcealer: natural glōCamouflage: natural or beige
veins	blue-green	glōConcealer: honey glōCamouflage: golden-honey
hyperpigmentation	brown, blue-brown	glōConcealer: honey glōCamouflage: natural or beige
hypopigmentation	white, pink	glōConcealer: honey glōCamouflage: natural or beige

glōLid primer

Whether you have naturally oily eyelids or find yourself in an environment where you produce more oil, glōminerals lid primer is your solution. A small amount applied before eye shadow assures that your shadow can withstand almost any condition. This formulation works for fair to medium complexions.

glōLid primer serves 2 purposes:

- Formulated with a greater concentration of pigments to conceal discoloration on the lids and brighten darker shadows.
- glōLid primer provides superior surface adhesion of glōEye shadows with its tackier finish. glōEye shadows will stick to the glōLid primer offering a longer-lasting application.

Application:

Use the camouflage brush to apply a small amount of this product to the eyelid. Because of the intense concentration of pigment in this product, a very small amount is sufficient to cover the entire lid. Let it set for about a minute before glōEye shadow application.

foundation application brushes

natural hair brushes

glōminerals delivers the finest natural hair brushes, equipped with long-lasting, high-quality handles. Each brush head is assembled with precision to enable ideal control and placement of product on the skin. All brushes are washable and recommended for both professional and personal use.

ultra: squirrel

Use for all-over base application giving sheer to full coverage with the glōPressed or glōLoose base. With a medium bristle pack, this is the most versatile of the foundation brushes.

kabuki: black capra

Offers a full head, with dense bristle pack, designed to achieve medium to full coverage when applying the glōPressed or glōLoose base. Also beneficial for all-over blending.

powder: black capra

A full, soft brush with a loose bristle pack, designed to achieve sheer to medium coverage with the glōPressed or glōLoose base. Ideal for applying glōDust, glōBronze, glōMatte finishing powder or glōPerfecting powder to face or body.

blender: black capra

Perfect for either glōBronze application or all-over blending.

synthetic hair brushes

Synthetic hair brushes are used with products that contain a liquid or wax base. Synthetic hair is easier to clean thoroughly and will not promote bacterial growth.

liquid foundation: orange taklon

Used to apply the glōProtective liquid and glōSheer tint foundations. This versatile brush is able to apply sheer to full coverage depending on the desired application.

camouflage brush: orange taklon

A perfect tool for glōCamouflage and glōConcealer application. Use on under eye areas or to cover large areas of pigmentation.

precision camouflage: orange taklon

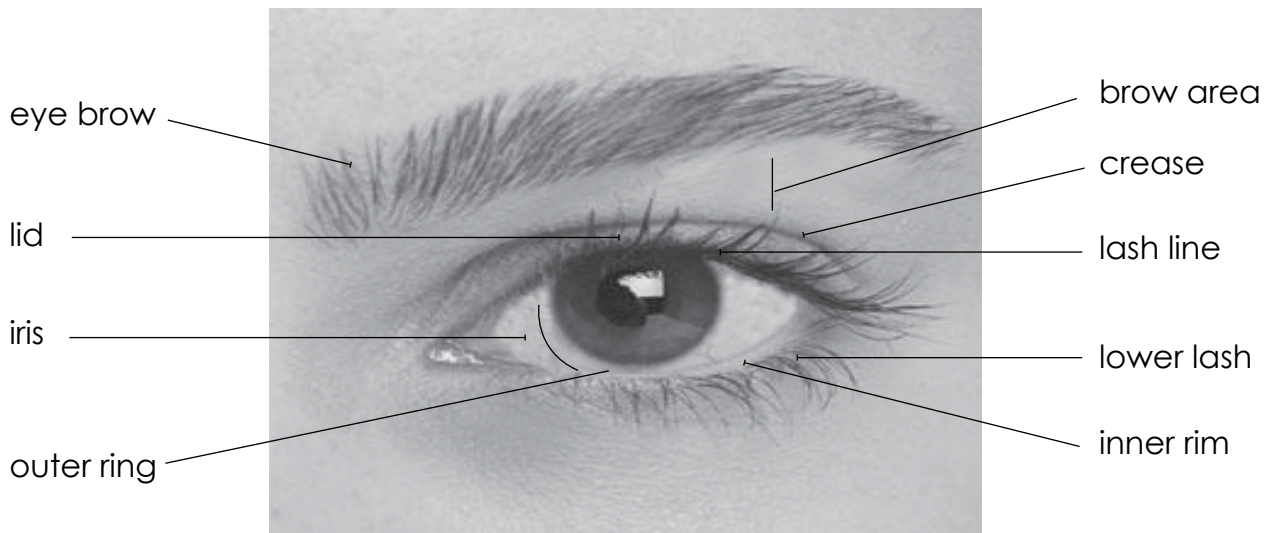

A precision tool designed to camouflage small areas. It is capable of applying glōConcealer or glōCamouflage to the smallest, most challenging areas such as skin imperfections or to the corners of the eye.

texture brush: black capra & taklon

This brush is ideal for creating soft layers of shimmer or adding subtle texture to your make up. The flat top is used for lightweight application.

glōEye shadow application

eye makeup terminology

- **brow color:** Color applied to balance brow. Usually applied before eye shadow.
- **eye shadow base color:** First color applied all over lid and brow area.
- **eye shadow contour color:** Second color applied. Requires specific placement.
- **eye shadow highlight color:** Third color applied. Requires specific placement.
- **eye liner:** Applied before shadow if using pencil, applied after shadow if cream or powder.
- **mascara:** Applied last. Used to lengthen, darken and/or thicken appearance of lashes.

eye shadow formulas

glōEye shadow

- Rich hues and timeless color favorites delivering crease-free coverage
- Perfect to highlight and contour all eye shapes

glōLoose eye shadow

- Radiant loose pigment shadows that offer gorgeous, buildable color
- Keep coverage light to use as base or highlight color, or apply more layers to increase depth and intensity

glōReflection cream eye shadow

- A metallized, creamy formulation, that casts a delicate wash of color across the eye
- Can be applied with the camouflage brush or wand applicator

beginning your eye makeup application

STEP 1: eye shadow **base** color:

- This color is generally used to lighten the eye area
- Color choices should be equal to or lighter (by one or two shades) than the skin tone
- Applied all over eye from lash line to eyebrow

Recommended Colors:

- Matte: seashell, fawn, bamboo, haze, banana, honey, opal, delight
- Shimmer: diamond, twinkle, copper sheen 1 or 2, sandstone 1, champagne 1, mulberry 1, amethyst 1

STEP 2: eye shadow **contour** color:

- Contour gives the eye depth.
- To be effective, contour color must be equal to or darker than that of a natural shadow.
- Natural shadow is taupe in color.
- Contour has specific placement and purpose.

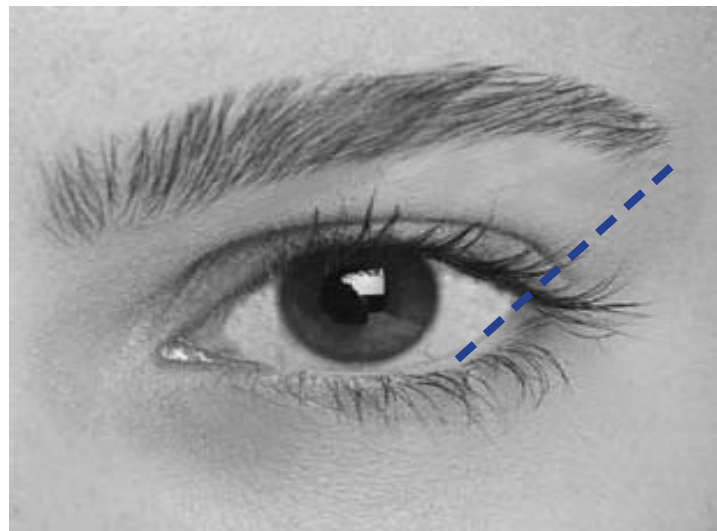

Recommended Colors:

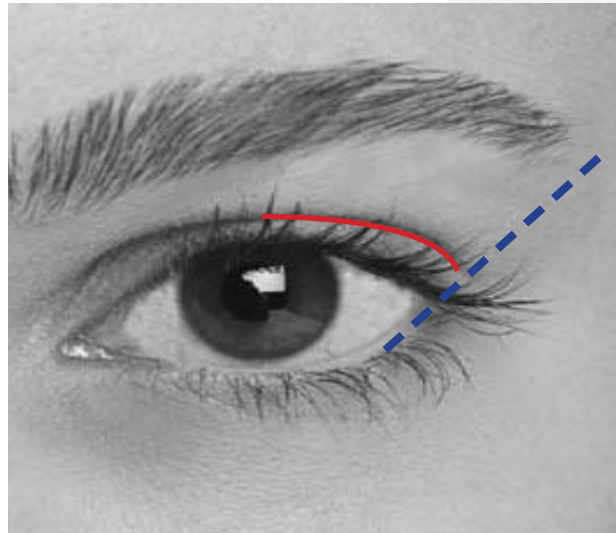

- Matte: kona, twig, blue suede, blackberry, spice, mahogany, sandstone 3, champagne 3, palm 3, amethyst 3, mulberry 3, onyx, coffee 3
- Shimmer: mink, harvest, copper sheen 3, posh 3, mulberry 2, gilded bronze

correct contour application

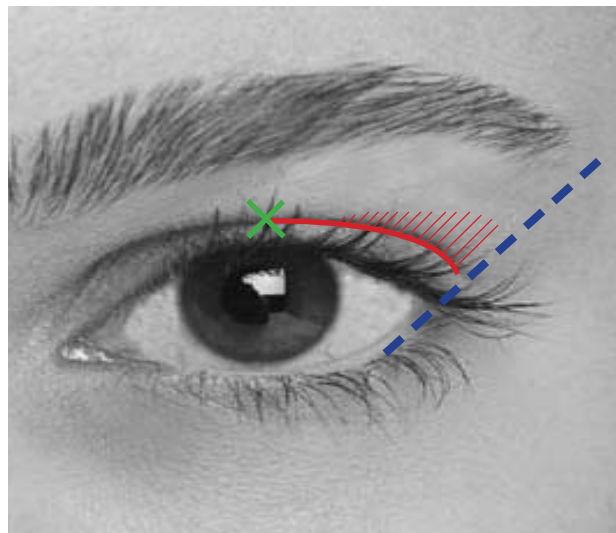

The first line is found by tracing a line from the outer corner of the eye to the outer tip of the brow.

The **second line** is placed along the crease to the third line.

The **third line** is found by following the curve of the iris to the crease.

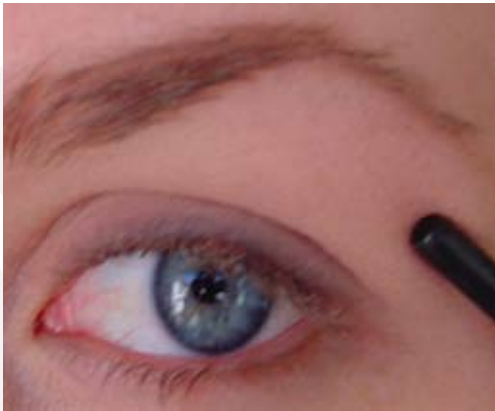

contour blending

A. Eye shadow contour should be darkest in the crease and blend outward.

B. Contour should be blended up no further than half the distance between the crease and the brow.

contour should not be blended past this point

contour has been blended too far

C. Blending should be smooth.

smoothly blended shadow

incorrectly blended shadow

STEP 3: eye shadow highlight color

- Highlight colors should never be lighter than the lightest color in the eye or brighter than the brightest color in the eye.
- Highlight color is placed on the lid.

Recommended Colors:

- Shimmer: twinkle, orchid, rainforest, water lily, harvest, sand pebble, opulent pink, golden pearl, lilac, copper sheen 2, sandstone 2, posh 2, palm 2, amethyst 2

eye color selection

Bring out the color in your eyes with our recommended eye shadow combinations:

Base Colors:

Peach, Nude

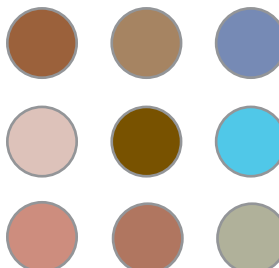

- palm 2
- fawn
- sandstone 1
- copper sheen 2
- sand pebble
- honey

Contour Colors:

Blue / Grey, Burnt Orange

- copper sheen 3
- twig
- blue suede
- coffee 2
- dusk
- ocean
- spice
- harvest
- ballerina 2

Highlight Colors:

Soft White / Cream, Light Blue

- diamond
- opal
- coffee 2
- golden pearl
- delight

blue eyes

Base Colors:

Melon, Yellow, Pink

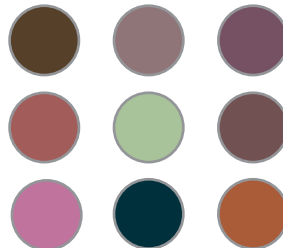

haze, copper sheen 1
bamboo, sea shell
ballerina 1

Contour Colors:

Red / Brown, Plum, Green / Blue

mahogany
blackberry
amethyst 2
champagne rose 3
aqua chiffon
dusk, berry
mermaid, sahara 3

Highlight Colors:

Gold, Melon, Lilac

twinkle
lilac, orchid
sand pebble
water lily
opulent pink

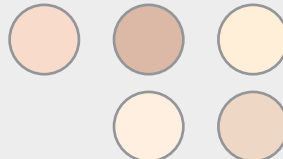

green eyes

Base Colors:

Melon, Yellow, Pink

coffee 1
haze
copper sheen 1
bamboo
sea shell

Contour Colors:

Red / Brown, Plum, Green / Blue

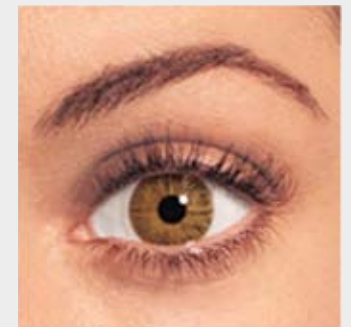

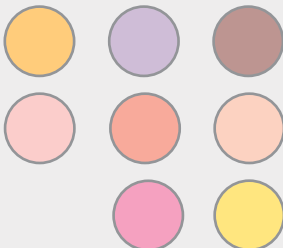

dusk, eggplant
blackberry
amethyst 2
champagne rose 3
gilded bronze
fern

Highlight Colors:

Gold, Melon, Lilac

twinkle
lilac
orchid
posh 2
water lily
cheerful
playful
sahara 1

hazel eyes

Base Colors:

Yellow / Cream, Peach, Rose

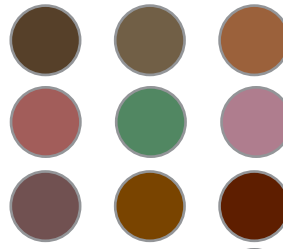

coffee 1, bamboo
sandstone 1
copper sheen 1
banana, delight

Contour Colors:

Red / Brown, Plum / Violet, Dark Brown, Burnt Orange, Black

mahogany, mink
copper sheen 3
amethyst 3
palm 3, posh 3
dusk, kona
coffee 3, mulberry
whimsical, charming

Highlight Colors:

Gold, Autumn, Light Green, Peach

twinkle
copper sheen 2
rain forest
sand pebble
palm 2, posh 2

brown eyes

glōEye liner application

glōPrecision eye pencil

Ten shades: brown, black/brown, black, charcoal, peach, deep olive, plum, antique gold, silver lilac, twilight

Each glōPrecision eye pencil offers an advanced mineral formula that glides on like silk, never runs and is formulated for even the most sensitive eyes. glōminerals eye pencils are even safe to use on the inner rim of the eye. For thick, thin or smoky lined eyes, each pencil has an artist's blending point on the end.

Applying glōPrecision eye pencil

- To apply a clean, controlled line, you must start with a sharp tip.
- If you are using the glōPencil sharpener, remove the red insert to create a sharp tip.
- Gently roll the pencil on the back of your hand to remove any pencil shavings.
- Hold the pencil so the tip is pointing towards the nose.
- You will be able to create a sharper, more accurate line with the side of the pencil than with the tip.
- Place the pencil directly up against the lash line.
- To draw your line, twist the pencil towards you as you pull it across the lid in several strokes.
- Repeat this process to create a darker or thicker line.
- Smudge the top edge of your line with the attached blending point or the mini crease brush if you desire a smoky look.
- glōPrecision eye pencils are not recommended for mature or extremely oily clients.
- When using the glōPrecision eye pencil in peach or silver lilac, keep in mind that light eyeliner colors are designed to create the illusion of a larger or more open eye. To achieve this effect color is applied to the inner rim only.

glōLiquid eye liners

Three shades: coal, mocha, purple haze

glōLiquid eye liner glides on with a pin point precision brush and dries quickly. Plum, black and brown color pigments can go from a delicate enhancement to an intense bold line.

glōCream eye liners

Five shades: slate, sapphire, espresso, ebony, eggplant

glōCream eye liner is the answer for a fast, flawless liner application with absolute precision. Applied with an eye liner / brow brush, the crease-free, creamy formulation soothes and protects the delicate skin around the lash line.

Applying glōCream eye liner

- The recommended brush for applying glōCream eye liner is the eyeliner / brow brush.
- Transfer the liner to the brush tip, making sure to have an even distribution.
- Place the brush three-quarters of the way in across the lash line.
- Hold the brush vertically and place as close as possible to the lash line.
- Walk the brush across the lash line.
- Repeat this process to create a darker or thicker line.
- Smudge the top edge of your line with the mini crease brush to create a soft or smoky look.
- To alter the color of glōCream eye liners, brush a glōEye shadow or glōDust over the cream liner.
- To set glōCream eye liner, dust with matching glōEye shadow color.
- glōCream eye liner is not recommended for mature or extremely oily clients.

glōEye shadow / powder liner

glōEye shadows can be used to line the eyes in place of glōPrecision eye pencils and glōCream eye liners.

Recommended colors: kona, twig, blue suede, blackberry, posh 3, sandstone 3, mulberry 3, champagne 3, amethyst 3, sable, eggplant, fern

Applying powder liner

- Applied the same way as glōCream liners. See directions above.
- Recommended brushes are eyeliner / brow or dual brow brushes.
- Powder liner is ideal for mature and excessively oily clients.

eye liner placement

The purpose of eye liner

- Gives the illusion of a thicker lash line.
- Emphasizes the shape of the eye.
- Creates the illusion of a different eye shape.

Point #1:

Apply eye liner on the top & bottom, one-half to three-quarters of the way across the lid. Taper the line towards the inside of the eye.

Point #2:

The color on the lower lash line should always be lighter than the color on the upper lash line. Dark colors on the bottom lash line pull the eye downward and shift focus from the upper lash line to the lower.

correct

incorrect

Point #3:

Bottom lash liner should always be soft and blended. Avoid hard, sharp lines.

correct

incorrect

glōBrow products

glōBrow gel

Three colors: clear, taupe, brown

glōBrow gel is a water based formulation, enriched with antioxidants, providing brow-sculpting control in tinted or clear formulations. glōBrow gel not only defines lines, but provides instant coverage for unwanted gray, silver or blond hair.

Applying glōBrow gel

- Apply glōBrow gel after pencil or powder liner has been applied.
- First brush brow hair into place with spoolie brush.
- Apply gel in the same direction as hair was brushed.

glōPrecision brow pencils

Four colors: taupe, auburn, blonde, brunette

glōPrecision brow pencils give fast, natural-looking brow enhancement in a non-comedogenic mineral formulation that not only fills in the brows, but helps sculpt and shape as well. Each glōPrecision brow pencil has a versatile brow sculpting brush on the end for a 2-in-1 shaping and blending.

Applying glōPrecision brow pencils

- Brush brow hair into place with the spoolie brush.
- Fill in the sparse areas with glōPrecision brow pencil.
- Use spoolie brush to lift and or lighten color.
- glōPrecision brow pencils are ideal for use with little to no hair.

glōBrow powder duos

Three colors: auburn, brown, taupe

glōBrow powders are ideal for filling in sparse areas of the brow to enhance or darken the natural brow. Achieve the perfect brow by mixing the 2 shades in each glōBrow powder duo to expertly fill in sparse areas of the brow. Use either the eye liner / brow brush or the dual brow brush to apply this formulation to brows. Our glōminerals makeup team even suggests trying to draw in individual hairs for a more realistic looking brow. For best color adhesion, brush in brow powder color against direction of hair growth.

brushes for eye makeup application

eye base: pure pony

Use to apply your eye shadow base color over the entire lid. After contour has been applied, the eye base brush can be used to blend as well.

angled eye: squirrel / pony blend

The angled eye brush is a thick, flat-headed brush that is used to apply a wash of color to the lid or a heavy contour in the crease of the eye. Also used for finishing the eye shadow blending.

eye contour: pure pony

This angled brush is the perfect size to apply contour shades to the crease of the eye.

eye definer: pure pony

Perfect for detail shadow application and highlighting under the brow or above the lash line. Use this brush to place contour or add shimmer powder over any glōEye shadow application.

crease: squirrel

The crease brush is designed to give a light or heavy contour application to the eye.

mini crease: pure pony

The mini crease is the ideal detail brush for small areas. Use to contour the eye crease or create a smoky look with one of the glōEye liners.

eye liner / brow: bronze taklon

Use the eye liner / brow brush wet or dry along with a shadow or cream liner to define lash line and brows.

dual brow: ox / mongoose

A dual headed brush offering stiff bristles to fill in and shape eye brows. Use the large end all over brows and the smaller end for detailing and blending.

smudge: pure pony

Designed for applying eyeliner and eye shadow near the lash line, as well as blending and contouring to create a smoky effect.

spoolie

The spoolie brush is designed for your lashes and brows. The full head tapers to a point for easy use on any length or lash thickness. Great for grooming lashes and brows as well as smoothing and blending.

glōMascara

Lashes and formula choice

Lash hair is no different from the hair on one's head: It can be thick or thin, well distributed or sparse, curly or straight, long or short, blonde, red, brown or black. Therefore, mascara formulas differ, as shampoo formulas do, for the type of lash.

glōLash lengthening mascara: black, brown/black

This is a pure pigment formula with no fillers. This mascara formula is ideal for full and / or long lashes that need to be darkened, not volumized. This particular brush head is designed to evenly distribute pigment over the entire length of the lash.

glōVolumizing mascara: black, brown

This formula has additives that adhere to the lash creating both a darker and fuller lash line. Use this for thin and / or sparse lashes. The glōVolumizing brush head is designed to deposit greater amounts of pigment to the lash.

glōLash thickener & conditioner: clear

The conditioning formula, like the glōVolumizing mascara, contains additives that adhere to the lash. This formula is used to lengthen the lash and is ideal for use with short lashes. For short but full lashes, follow with the glōLengthening mascara. For short and sparse lashes, follow with glōVolumizing mascara.

Applying glōMascara

- To prevent mascara from clumping, allow each coat 30 seconds to dry before reapplying.
- To remove clumps, gently press between fingers, or use a spoolie brush to comb and separate lashes.
- Remember to coat both the top and bottom of the lash.
- In professional use, avoid perpetuating infection by always using a disposable spoolie brush to apply mascara.
- Mascara should be replaced every three months.
- To prevent mascara from drying out, avoid pumping applicator in tube.

glōEye makeup remover

This ultra-gentle, oil free eye makeup remover is specially formulated to quickly and easily remove all traces of eye makeup. glōEye makeup remover leaves no residue and is suitable for even the most sensitive eyes.

glōminerals lash curler

The glōminerals lash curler has a flatter arch, making it ideal for use on all eye shapes. Use the lash curler to give the lashes lift, opening up the eye.

Usage tips

- Curl lashes before applying mascara to prevent lashes from being torn out.
- Replace lash strip when curler creates an "L" shaped lash.

glōBlush application

Blush application styles and colors are subject to fashion. Sometimes blush is preferred heavy and bright in cool colors, while other times it's light and sheer in warm colors. To keep abreast of change, one has to watch for new trends in fashion. However, there are a few application techniques that make any blush application look its best.

glōBlush formulations

- **glōBlush:** Greatest diversity of colors and works well on all skin types.
- **glōCream blush:** Ideal for creating a sheer glō-ing finish on dry skin.
- **glōBronzing stick:** Adds a warm touch of tan anytime of the year, giving you a natural sun-kissed glō.

natural blush placement

- Blush should appear to come from within the skin, like a natural flush.
- To create this look, artists should apply blush only to areas of the cheek that flush, namely the apple.
To locate the apple you have 2 options:
 1. Have the person smile. The apple will stick out to the right and left of the nose.
 2. Measure down from the center of the iris to the cheek. The apple falls in-line with the iris.

corrective blush placement

- The goal is to use blush placement to create an upward angle.
- Blush is placed along the center of the cheekbone up towards the ear.
- Blush will be most concentrated on the apple and gradually fade upwards.
- This method creates beneficial angles in more mature clients.

glōBlush brushes

angled blush: black capra
Contours the cheekbones and enhances the cheek if using a highlighting color.

blush: pure pony
Designed for light shading or color enhancement of the cheek area.

cream blush: raccoon synthetic
Designed for blending your cream blush giving you a smooth, even application.

fan: badger synthetic
A brush designed for delicate blush, bronzer and shimmer application. Ideal for applying powder to the under eye area and for removing shadow fall out.

texture brush: black capra and taklon
This brush is ideal for creating soft layers of shimmer or adding subtle texture to your makeup. The flat top is used for lightweight application.

glōEnhancers

glō-ing products to illuminate and bronze your face and body. Perfect additions to enhance your glōminerals application.

glōBody glisten & glōBody bronzer

glōBody glisten adds shimmer and sparkle to give your skin that extra glō. Smooth glōBody bronzer on exposed skin wherever you want noticeable radiance of a just-vacationed, sunkissed glō. Apply to exposed skin on any part of your body day or night.

glōHighlighter

Apply this pink luminizer anywhere you want a subtle, natural glow that can instantly brighten your complexion. Apply with fingertips in a curve from the brow bone down to the top of the cheekbones.

glōDust 24K

A color and shine enhancer that delivers a range of effects from a subtle sparkle to a gilded skin tone. We recommend using glōDust on the face, body, in the hair or wherever you want to shimmer.

glōHydration mist

A blend of antioxidants and anti-aging benefits in a mist that hydrates instantly. Spray the skin before or after makeup application to set makeup and to refresh the skin throughout the day. Use when skin feels dry, when exposed to dry climate conditions, or when skin needs an instant burst of hydration.

glōShimmer brick

Be an instant sensation with our glōShimmer brick in gleam or luster. Four beautiful colors that you can use together for a captivating glō or use individually for a subtle highlight.

gradual glō

Indulge in a touch of sun everyday. This moisturizing formula combines the benefits of Aloe Vera with a hint of self tanner for a natural, gradual glō.

glōLips

Offered in nine hydrating and healing formulations with application options for any style:

glōPrecision lip liner

A long wearing, water-resistant liner to define lips and help keep color in place. Each pencil has a lip brush to make blending easy.

glōLip stick

A moisturizing lip stick that provides vibrant color and remarkable wearability.

glōSheer lip stick

glōSheer lip sticks moisturize lips while providing a delicate flush of color.

glōGloss

Moisturizing color and shine to be worn alone or over another lip color.

glōLiquid lips

A high-shine, luxurious formulation for an ultra-moist look that lasts. A true mineral makeup innovation proving high fashion can also be good for your lips.

glōGlaze lip polish

With our blend of kukui nut oil, kiwi oil and meadowfoam oil, this wax free, jojoba based lip polish helps promote moisturizing protection and allows the skin on your lips to breathe.

glōLip plumper

For a poutingly plump pucker, apply glōLip plumper alone or before other glōminerals lip products.

glōExfoliating lip wand

Wax microcrystals derived from jojoba seeds slough away dry skin and then melt on contact for smooth and hydrated lips.

glōMint balm

Protects lips with a full spectrum SPF 15 while nurturing botanicals of hemp seed oil, meadowfoam and mango seed butter soothe and heal.

balancing lips

Lips come in a variety of lengths and various degrees of fullness. An artist must identify whether the lips are thin, full, small or large and correct the shape to maintain ideal balance.

Proper lip shape:

- Lips should be the same length on the top and bottom and meet at the corners.
- Lips should be the same thickness on the top and bottom.
- Lips should have round, even slopes with no sharp peaks.

Steps to balancing lip shape

- Apply glōMoist lip treatment to lips prior to liner. Blot if necessary.
- Line natural lip line first.
- Extend lip line where necessary to balance lip.
- Fill in lip entirely.
- Apply lip stick over liner.
- Fix mistakes and lightly re-powder lip line.

How to make big lips look smaller

- Use a darker color all over lips **OR**,
- Line the natural lip line in a darker glōPrecision lip pencil color and balance as necessary.
- Feather glōPrecision lip pencil in toward the center of the lip.
- Choose a glōLip stick color 2-3 shades lighter than glōPrecision lip pencil.
- Apply glōLip stick to center of lip.
- With a brush, blend glōPrecision lip pencil and glōLip stick together.
- Re-line lip if necessary.

How to make small lips look larger

- Use a light or frosted color all over lips **OR**,
- Conceal lip line.
- With a light color, line the natural lip.
- Extend the lip line from natural lip line to enlarge lips. It is important to keep top and bottom proportional.
- Fill in lip.
- Apply a glōLip stick color that is light, frosted and glossy.

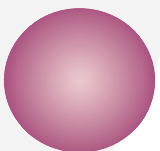

Lip Color Family Organization

glōminerals lip colors are broken down by color family to assist in color identification and selection.

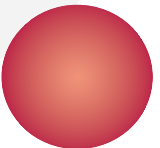

Pink Family:

Bright: tulip, taffy, pink sugar, fiji
Natural: blush, natural, bella, blossom, aruba, pink ginger, persimmons
Rose: rose petal, sugarplum, snapdragon, bordeaux, tahiti, sheer berry, celestial
Deep Pink: primrose, aubergine, bougainvillea

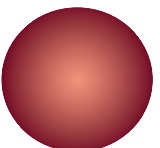

Violet Family:

Light: willow, bora bora, blushing, celestial, luminosity
Dark: plum glaze

Red Family:

Bright: siren, spiced rum, vixen
Deep Red: cabaret, black cherry

Brown Family:

Light: toffee, cashmere, praline, nutmeg, coral, jamaica, copper shimmer
Dark: cinnamon

Best Fits for Color & Liner Matching

Pair glōLip liners and glōLip stick colors that suit each other to create color harmony

-  currant: aubergine, primrose, vixen, siren, spiced rum, cabaret
-  natural: snapdragon, rose petal, sugarplum, blossom, spiced rum, toffee, nutmeg, aruba
-  autumn: cinnamon, aubergine, cabaret
-  raisin: cinnamon, cabaret, spiced rum, toffee
-  rosewood: bella, blossom, rose petal, snapdragon, sugarplum, bordeaux, cashmere
-  vino: primrose, aubergine, bordeaux, snapdragon, cabaret
-  petal: rose petal, snapdragon, sugarplum, pink sugar, bella, primrose, tahiti, bora bora
-  sherbet: taffy, tulip, rose petal, siren, spiced rum
-  redwood: spiced rum, sugarplum, jamaica, tahiti
-  cedar: nutmeg, cashmere, natural, bella, sugarplum, aruba
-  cocoa: cinnamon, toffee, cabaret, spiced rum
-  crushed raspberry: raspberry, sugarplum, aubergine, primrose
-  hazelnut: praline, toffee, cashmere

Our favorite lip color combinations: the perfect lip liner, lip stick and shine collection

<u>lip pencil</u>	<u>lip stick</u>	<u>shine</u>	<u>lip pencil</u>	<u>lip stick</u>	<u>shine</u>
 rosewood	 rose petal	 romance	 natural	 bella	 peony
 natural	 praline	 mango	 cedar	 cinnamon	 precious
 raisin	 cabaret	 black cherry	 petal	 sugarplum	 darling
 redwood	 natural	 adore	 cocoa	 spiced rum	 poppy
 autumn	 snapdragon	 shine	 autumn	 nutmeg	 plum glaze
 currant	 bordeaux	 pink ginger	 vino	 aubergine	 shine
 sherbet	 tulip	 darling	 cedar	 aruba	 coconut
 cedar	 rose petal	 beloved	 redwood	 jamaica	 persimmons
 redwood	 spiced rum	 precious	 crushed raspberry	 raspberry	 lilac luster
 petal	 bella	 blushing	 hazelnut	 blush	 galaxy

lip brushes and tools

lip definer: pure red sable

The lip definer brush is used to blend lip color and liner over the lips. It can be used with glōLip stick, glōGloss and glōLiquid lips.

glōPencil sharpener: the butterfly

A wonderful pencil sharpener that can give either a sharp or round point. To create a sharp tip, simply remove the red lever from the sharpener.

glōBrush care

glōminerals brush cleaner

All brushes should be cleaned between each application with glōminerals brush cleaner. The brush cleaner is an alcohol based cleanser designed to disinfect. To avoid color contamination glōminerals recommends washing your brushes at the end of every day.

Washing and drying glōminerals brushes

- To wash your natural hair brushes, use a gentle or conditioning formula shampoo.
- For the synthetic hair brushes, an antibacterial soap works well to remove clinging product.
- Wash the brush with the bristles facing down.
- One should keep excess water from entering the barrel.
- Remove all remaining color and soap from the bristles.
- When washing is complete reshape the bristles back to their appropriate shape and lay brush at an incline.
- Water trapped in the barrel can rot the glue leading to an offensive odor and brush hair loss.

glōminerals ingredient decks

glōBlemish stick

INGREDIENTS: Ozokerite, Beeswax, Ricinus Communis (Castor) Seed Oil, Titanium Dioxide (CI 77891), Pentaerythrityl Tetraisostearate, Polyethylene, Copernicia Cerifera (Carnauba) Wax, Octyldodecanol, Distearidimonium Hectorite, Propylene Carbonate, Salicylic Acid, Allyl Methacrylates Crosspolymer, Tocopheryl Acetate, Phenoxyethanol, Pentaerythrityl Tetra-di-*t*-butyl Hydroxyhydrocinnamate, Carthamus Tinctorius (Safflower) Seed Oil, Aloe Barbadensis (Aloe Vera) Leaf Extract, Cucumis Sativus (Cucumber) Fruit Extract, Chamomilla Recutita (Matricaria) Flower Extract, May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499)

glōBlush (begonia, innocent, papaya, paradise, spice berry, sweet)

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Phenoxyethanol, Tocopherol, Lauroyl Lysine, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentyldiol, Water May Contain (+/-): Tin Oxides (CI 77861), Iron Oxides (CI 77491, CI 77492, CI 77499), Manganese Violet (CI 77742), Carmine (CI 75470), Red 7 Lake (CI 15850:1), Ultramarines (CI 77007), Red 30 Lake (CI 73360), Red 27 Lake (CI 45410:2), Yellow 5 Lake (CI 19140:1)

glōBlush (bare, hibiscus, lilac silk, nectar, rosebud, sandalwood, sheer petal, sunset)

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Phenoxyethanol, Tocopherol, Lauroyl Lysine, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentyldiol, Water, May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499), Tin Oxides (CI 77861), Bismuth Oxochloride (CI 7787-59-9), Manganese Violet (CI 77742), Carmine (CI 75470), Ultramarines (CI 77007)

glōBlush duo

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Phenoxyethanol, Tocopherol, Lauroyl Lysine, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentyldiol, Water, May Contain (+/-): Tin Oxides (CI 77861), Iron Oxides (CI 77491, CI 77492, CI 77499), Manganese Violet (CI 77742), Carmine (CI 75470), Red 7 Lake (CI 15850:1), Ultramarines (CI 77007), Red 30 Lake (CI 73360), Red 27 Lake (CI 45410:2), Yellow 5 Lake (CI 19140:1)

glōBody bronzer

INGREDIENTS: Water, Butylene Glycol, Isohexadecane, Titanium Dioxide (CI 77891), Glycerin, Tribehenin PEG-20 Esters, Tricaprylin, Propylene Glycol Dicaprylate/Dicaprate, Isopropyl Isostearate, Octyldodecanol, Sodium PCA, Magnesium Aluminum Silicate, Silica, Xanthan Gum, Disodium EDTA, Tocopheryl Acetate, Hydroxyethyl Acrylate/Sodium Acryloyldimethyl Taurate Copolymer, Squalane, Polysorbate 60, Chamomilla Recutita (Matricaria) Flower Extract, Aloe Barbadensis (Aloe Vera) Leaf Extract, Phenoxyethanol, Caprylyl Glycol, Ethylhexylglycerin, Hexylene Glycol, Fragrance, May Contain (+/-): Mica (CI 77019), Iron Oxides (CI 77491, CI 77492)

glōBody glisten

INGREDIENTS: Purified Water, Carthamus Tinctorius (Safflower Seed Oil), Mica, Titanium Dioxide (CI 77891), Caprylic/Capric Triglyceride, Glycerin, Stearic Acid, Dimethicone, Aloe Barbadensis, Retinyl Palmitate, Tocopherol, Cetyl Alcohol, Glycol Stearate, PEG-100 Stearate, Citrus Grandis (Grapefruit) Fruit Extract, Cucumis Sativus (Cucumber) Fruit Extract, Camellia Sinensis Leaf Extract, Bee Pollen Extract, Citrus Sinensis (Orange Flower) Extract, Anthemis Nobilis (Chamomile) Extract, Macrocyctis Pyriferae (Sea Kelp) Extract, Lavandula Angustifolia (Lavender) Extract, Fragrance, Carbomer, Diazolidinyl Urea, Iodopropynyl Butylcarbamate, Sodium EDTA, Tromethamine

glōBrightener highlight concealer

INGREDIENTS: Water (Aqua), Caprylic/Capric Triglyceride, Hexyl Laurate, Butylene Glycol, Polysorbate 80, Dimethicone, Palmitic Acid, Sorbitan Stearate, Glycerin, C12-20 Acid PEG-8 Ester, Lecithin, Stearyl Alcohol, Phenoxyethanol, Sodium Benzoate, Magnesium Aluminum Silicate, Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Sodium Hydroxide, Retinyl Palmitate, Tetrahexyldecyl Ascorbate, Tocopheryl Acetate, Titanium Dioxide (CI 77891), Mica, Iron Oxides (CI 77491, CI 77492)

glōBronze

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Phenoxyethanol, Tocopherol, Lauroyl Lysine, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentyldiol, Water May Contain (+/-): Bismuth Oxochloride (CI 77163), Iron Oxides (CI 77491, CI 77492, CI 77499), Tin Oxides (CI 77861), Carmine, Chromium Oxide Greens (CI 77288), Ultramarines (CI 77007)

glōBrow gel

INGREDIENTS: Water, SD Alcohol 40-B, PVP, Titanium Dioxide (CI 77891), Propylene Glycol, Carbomer, Triethanolamine, Phenoxyethanol, Caprylyl Glycol, Ethylhexylglycerin, Hexylene Glycol, May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499)

glōBrow powder duo

INGREDIENTS: Mica, Triethylhexanoin, Zinc Stearate, Titanium Dioxide (CI 77891), Boron Nitride, Silica, Tocopherol, Retinyl Palmitate, Ascorbyl Palmitate, Camellia Sinensis Leaf Extract, Water, Phenoxyethanol, Caprylyl Glycol, Isopentyldiol May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499), Chromium Oxide Greens (CI 77288)

glöBrush Cleaner

INGREDIENTS: Isopropyl Alcohol, Actiplex 2907, Rosmarinus Officinalis (Rosemary) Extract, Melissa Officinalis (Balm Mint) Extract, Eucalyptus Globulus (Eucalyptus) Extract, Zingiber Officinale (Ginger) Extract, Symphytum Officinalis (Comfrey) Extract, Cetraria Islandica (Iceland Moss) Extract, Lavendula Angustifolia (Lavender) Extract, Fragrance (Parfum)

glöCamouflage

INGREDIENTS: Caprylic/Capric Triglyceride, Octyldodecanol, Euphorbia Cerifera (Candelilla) Wax, Titanium Dioxide (CI 77891), Copernica Cerifera (Carnauba) Wax, Disteardimonium Hectorite, Propylene Carbonate, Jojoba Esters, Polyethylene, Tocopherol, Retinyl Palmitate, Ascorbyl Palmitate, Water, Butylene Glycol, Chamomilla Recutita (Matricaria) Flower Extract, Rosmarinus Officinalis (Rosemary) Leaf Extract, Camellia Sinensis (Green Tea) Leaf Extract, Phenoxyethanol, May Contain (+/-): Zinc Oxide (CI 77947), Iron Oxides (CI 77491, CI 77492, CI 77499)

glöCleansing cloths

INGREDIENTS: Water (Aqua), Citrus Aurantium Amara (Bitter Orange) Flower Water, Centaurea Cyanus Flower, Disodium Cocopolyglucose Citrate, Hamamelis Virginiana (Witch Hazel) Water, Hydrolyzed Sweet Almond Protein, Hydrolyzed Wheat Protein, Polysorbate 80, Disodium EDTA, DMDM Hydantoin, Polyaminopropyl Biguanide, Glycerin, PEG-4 laurate, lodopropynyl Butylcarbamate, Fragrance (Parfum)

glöConcealer (under-eye)

INGREDIENTS: Caprylic/Capric Triglyceride, Octyldodecanol, Euphorbia Cerifera (Candelilla) Wax, Titanium Dioxide (CI 77891), Copernica Cerifera (Carnauba) Wax, Disteardimonium Hectorite, Propylene Carbonate, Jojoba Esters, Polyethylene, Tocopherol, Retinyl Palmitate, Ascorbyl Palmitate, Carthamus Tinctorius (Safflower) Seed Oil, Camellia Oleifera Leaf Extract, Phenoxyethanol, MAY CONTAIN (+/-): Zinc Oxide (CI 77947), Iron Oxides (CI 77491, CI 77492, CI 77499)

glöCream blush

INGREDIENTS: Isopropyl Palmitate, Phenyl Trimethicone, Caprylic/Capric Triglyceride, Titanium Dioxide (CI 77891), Kaolin, Euphorbia Cerifera (Candelilla) Wax, Microcrystalline Wax, Silica, Nylon-12, Ricinus Communis (Castor) Seed Oil, Vegetable Oil, BHT, Phenoxyethanol, Tocopheryl Acetate, Tocopherol, MAY CONTAIN (+/-): Mica, Iron Oxides (CI 77491, CI 77492, CI 77499), Ultramarines (CI 77007), Red 7 Lake (CI 15850:1), Red 6 Lake (CI 15850), Blue 1 Lake (CI 42090:2)

glöCream eye liner

INGREDIENTS: Ethylhexyl Palmitate, Phenyl Trimethicone, Tribehenin, Titanium Dioxide (CI 77891), Ozokerite, Octyldodecanol, Nylon-12, Silica, Kaolin, Tocopherol, Retinyl Palmitate, Carthamus Tinctorius (Safflower) Seed Oil, Ascorbyl Palmitate, Tocopheryl Acetate, Camellia Oleifera (Green Tea) Leaf Extract, Aloe Barbadensis (Aloe Vera) Leaf Extract, Phenoxyethanol, MAY CONTAIN (+/-): Mica (CI 77019), Iron Oxides (CI 77491, CI 77492, CI 77499), Ultramarines (CI 77007), Manganese Violet (CI 77742), Ferric Ferrocyanide (CI 77510)

glöDust 24k

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Phenoxyethanol, Tocopherol, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentyl diol, Water, May Contain (+/-): Bismuth Oxychloride (CI 77163), Iron Oxides (CI 77491, CI 77492, CI 77499), Ultramarines (CI 77007), Chromium Oxide Greens (CI 77288), Carmine (CI 75470)

glöExfoliating Lip Wand

INGREDIENTS: Jojoba Esters, Microcrystalline Wax/Cera Microcristallina, Iron Oxides (CI 77492, CI 77491), Red 30 Lake (CI 73360), Talc, Titanium Dioxide (CI 77891), Yellow 5 Lake (CI 19140), Jojoba Esters, Isopropyl Jojobate, C18-38 Alkyl Hydroxystearoyl Stearate, Flavor/Aroma

glöEye makeup remover

INGREDIENTS: Water (Aqua), Disodium Lauroamphodiacetate, Sodium Trideceth Sulfate, Hexylene Glycol, Butylene Glycol, Polysorbate 20, Aloe Barbadensis Leaf Juice, Phenoxyethanol, Capryl Glycol, Ethylhexylglycerin, Hexylene Glycol, Sodium Dehydroacetate, Potassium Sorbate, Disodium EDTA

glöEye shadow (blue suede)

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Phenoxyethanol, Tocopherol, Lauryl Lysine, Boron Nitride, Silica, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Silica, Caprylyl Glycol, Isopentyl diol, Water May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499), Tin Oxides (CI 77861), Bismuth Oxychloride (CI 77163), Carmine (CI 75470), Manganese Violet (CI 77742), Ferric Ferrocyanide (CI 77510), Chromium Oxide Greens (CI 77288), Ultramarines (CI 77007), Blue 1 Lake (CI 42090), Yellow 5 Lake (CI 19140:1)

glöEye shadow (bamboo, banana, berry, blackberry, diamond, dusk, eggplant, fern, fawn, harvest, haze, honey, kona, lilac, mahogany, mermaid, mink, ocean, opal, orchid, rainforest, sable, seashell, spice, twig, twinkle, water lily)

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Phenoxyethanol, Tocopherol, Lauryl Lysine, Boron Nitride, Silica, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentyl diol, Water, May Contain: Iron Oxides (CI 77491, CI 77492, CI 77499), Tin Oxides (CI 77861), Bismuth Oxychloride (CI 77163), Carmine (CI 75470), Manganese Violet (CI 77742), Ferric Ferrocyanide (CI 77510), Chromium Oxide Greens (CI 77288), Ultramarines (CI 77007)

glöEye shadow (sand pebble)

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Zinc Stearate, Titanium Dioxide (CI 77891), Phenoxyethanol, Tocopherol, Lauryl Lysine, Boron Nitride, Silica, Calcium Sodium Borosilicate, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentyldiol, Water, MAY CONTAIN (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499), Tin Oxides (CI 77861), Bismuth Oxychloride (CI 77163)

glöEye shadow trio (copper sheen, sahara)

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Boron Nitride, Phenoxyethanol, Tocopherol, Silica, Lauryl Lysine, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentyldiol, Water May Contain: Iron Oxides (CI 77491, CI 77492, CI 77499), Tin Oxides (CI 77861), Bismuth Oxychloride (CI 77163), Carmine (CI 75470), Manganese Violet (CI 77742), Ferric Ferrocyanide (CI 77510), Chromium Oxide Greens (CI 77288), Ultramarines (CI 77007)

glöEye shadow trio (ballerina, coffee)

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Calcium Aluminum Borosilicate, Calcium Sodium Borosilicate, Silica, Phenoxyethanol, Boron Nitride, Lauryl Lysine, Tocopherol, Camellia Sinensis Leaf Extract, Ascorbyl Palmitate, Retinyl Palmitate, Caprylyl Glycol, Isopentyldiol, Water May Contain: Iron Oxides (CI 77491, CI 77492, CI 77499), Carmine (CI 75470), Manganese Violet (CI 77742), Ferric Ferrocyanide (CI 77510), Chromium Oxide Greens (CI 77288), Ultramarines (CI 77007)

glöEye shadow trio (amethyst, champagne rose, mulberry, sandstone)

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Phenoxyethanol, Tocopherol, Lauryl Lysine, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentyldiol, Water May Contain: Iron Oxides (CI 77491, CI 77492, CI 77499), Tin Oxides (CI 77861), Bismuth Oxychloride (CI 77163), Carmine (CI 75470), Manganese Violet (CI 77742), Ferric Ferrocyanide (CI 77510), Chromium Oxide Greens (CI 77288), Ultramarines (CI 77007)

glöEye shadow trio (palm)

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Phenoxyethanol, Tocopherol, Lauryl Lysine, Boron Nitride, Silica, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentyldiol, Water May Contain: Iron Oxides (CI 77491, CI 77492, CI 77499), Tin Oxides (CI 77861), Bismuth Oxychloride (CI 77163), Carmine (CI 75470), Manganese Violet (CI 77742), Ferric Ferrocyanide (CI 77510), Chromium Oxide Greens (CI 77288), Ultramarines (CI 77007), Blue 1 Lake (CI 42090), Yellow 5 Lake (CI 19140:1)

glöFace primer

INGREDIENTS: Cyclomethicone, Dimethicone Crosspolymer, Ascorbic Acid, Tocopheryl Acetate, Camellia Sinensis Leaf Extract, Santalum Album (Sandalwood) Extract, Phellodendron Amurense Bark Extract, Hordeum Distichon (Barley) Extract, Vitis Vinifera (Grape) Seed Oil, Carthamus Tinctorius (Safflower) Seed Oil, Phenoxyethanol, Ethylhexylglycerin, Oligopeptide-10, Cyclopentasiloxane, Polysilicon-11, Butylene Glycol, Water (Aqua)

glöGlaze lip polish

INGREDIENTS: Simmondsia Chinensis (Jojoba) Seed Oil, Ethylene/Propylene/Styrene Copolymer, Butylene/Ethylene/Styrene Copolymer, Ricinus Communis (Castor) Seed Oil, Aleurites Moluccana Seed Oil, Limnanthes Alba (Meadowfoam) Seed Oil, Actinidia Chinensis (Kiwi) Seed Oil, Retinyl Palmitate, Tocopheryl Acetate, Tetrahexyldecyl Ascorbate, Citral, Limonene, Linalool, Phenoxyethanol, Sodium Benzoate, Flavor (Aroma), May Contain (+/-): Titanium Dioxide (CI 77891), Mica, Iron Oxides (CI 77499, CI 77492, CI 77491), Red 7 Lake (CI 15850), Red 27 Lake (CI 45410), Yellow 5 Lake (CI 19140), Red 6 Lake (CI 15850)

glöGloss (shine)

INGREDIENTS: Polybutene, Ethylhexyl Palmitate, Octyldodecanol, Phenoxyethanol, Tocopheryl Acetate, Tocopherol, Vanillin, Carthamus Tinctorius (Safflower) Seed Oil, Aloe Barbadensis Leaf Extract, Camellia Oleifera (Green Tea) Leaf Extract, Retinyl Palmitate

glöGloss (all colors)

INGREDIENTS: Polybutene, Helianthus Annuus(Sunflower) Seed Oil, Octyldodecanol, Titanium Dioxide (CI 77891), Euphorbia Cerifera (Candelilla) Wax, Copernicia Cerifera (Carnauba) Wax, Ricinus Communis (Castor) Seed Oil, Calcium Aluminum Borosilicate Silica, Silica, Calcium Sodium Borosilicate, Trihydroxystearin, Polyethylene, Bumetizole, Phenoxyethanol, Vanillin, Carthamus Tinctorius (Safflower) Seed Oil, Aloe Barbadensis Leaf Extract, Camellia Oleifera (Green Tea) Leaf Extract, Retinyl Palmitate, Tocopherol, Tocopheryl Acetate, Ascorbyl Palmitate, May Contain (+/-):Mica, Iron Oxides (CI 77491, CI 77492, CI 77499) , Red 7 Lake (CI 15850:1), Red 27 Lake (CI 45410), Yellow 5 Lake (CI 19140), Carmine (CI 75470), Red 6 (CI 15850), Blue 1 Lake (42090:2)

glöGolden bronzing stick

INGREDIENTS: Ricinus Communis (Castor) Seed Oil, Octyldodecanol, Myristyl Lactate, Myristyl Alcohol, Euphorbia Cerifera (Candelilla) Wax/Candelilla Cera, Hydrogenated Polydecene, Bis-Diglyceryl Polyacyladipate-1, Hydrogenated Castor Oil, Cetyl Palmitate, Microcrystalline Wax/ Cera Microcristallina, Copernicia Cerifera (Carnauba) Wax/ Cera Carnauba, Kaolin, Beeswax/ Cera Alba, Retinyl Palmitate, Tocopheryl Acetate, Tocopherol, Camellia Sinensis Leaf Extract, Carthamus Tinctorius (Safflower) Seed Oil, Aloe Barbadensis Leaf Extract, Phenoxyethanol May Contain (+/-): Mica, Iron Oxides/ CI 77491, CI 77492, CI 77499, Titanium dioxide/ CI 77891

glöGradual glö

INGREDIENTS: Water (Aqua), Dihydroxyacetone, Cyclopentasiloxane, Cyclohexasiloxane, Cetyl Ethylhexanoate, Isopropyl Myristate, Sodium Acrylate/Sodium Acryloyldimethyl Taurate Copolymer, Isohexadecane, Polysorbate 80, Sodium Citrate, Erythulose, Hydroxyethyl Acrylate/Sodium Acryloyldimethyl Taurate Copolymer, Polysorbate 60, Aloe Barbadensis Leaf Juice, Citric Acid, Hydroxyethylcellulose, Fragrance (Parfum), Phenoxyethanol, Caprylyl Glycol, Ethylhexylglycerin, Hexylene Glycol, Potassium Sorbate

glöHighlighter

INGREDIENTS: Water, Butylene Glycol, Isohexadecane, Titanium Dioxide (CI 77891), Tribehenin PEG-20 Esters, Tricaprylin, Propylene Glycol Dicaprylate/Dicaprate, Isopropyl Isostearate, Diethylhexyl Syringylidenemalonate, Caprylic/Capric Triglyceride, Polysorbate 60, Octyldodecanol, Magnesium Aluminum Silicate, Cetearyl Alcohol, Boron Nitride, Xanthan Gum, Disodium EDTA, Symphytum Officinale (Comfrey) Leaf Extract, Chamomilla Recutita (Matricaria) Flower Extract, Aloe Barbadensis (Aloe Vera) Leaf Extract, Carthamus Tinctorius (Safflower) Seed Oil, Camellia Oleifera (Green Tea) Leaf Extract, Ascorbyl Palmitate, Phenoxyethanol, Caprylyl Glycol, Ethylhexylglycerin, Hexylene Glycol, May Contain (+/-):Mica (CI 77019), Iron Oxides (CI 77491), Carmine (CI 75470), Bismuth Oxochloride (CI 77163)

glöLash lengthening mascara

INGREDIENTS: Water (Aqua), PEG 75 Lanolin, Beeswax / Cera Alba, PVP, Acrylates Copolymer, Propylene Glycol, Cyclomethicone, Copernicia Cerifera(Carnauba) Wax / Cera Carnauba, Polybutene, C12-15 Alkyl Benzoate, Triethanolamine, Polysorbate 20, Shellac, Polysorbate 60, Cetearyl Alcohol, Xanthan gum, Anthemis Nobilis Flower Extract, Camellia Sinensis Leaf Extract, Tocopheryl Acetate, Ascorbyl Palmitate, Retinyl Palmitate, Simethicone, Methylparaben, Propylparaben, Phenoxyethanol, May Contain (+/-): Mica, Iron Oxides (CI 77499), Iron Oxides (CI 77492), Iron Oxides (CI 77491)

glöLash thickener & conditioner

INGREDIENTS: Water (Aqua), Beeswax / Cera Alba, Copernicia Cerifera(Carnauba) Wax / Cera Carnauba, Titanium Dioxide (CI 77891), Cyclomethicone, PVP, Glycerin, Magnesium Aluminum Silicate, Propylene Glycol Stearate, Glyceryl Stearate SE, Stearic Acid, Triethanolamine, Oleic Acid, Bis-Diglyceryl Polyacryladipate-2, Imidazolidinyl Urea, Cellulose gum, Camellia Sinensis Leaf Extract, Tocopherol, Ascorbyl Palmitate, Retinyl Palmitate, Simethicone, Tetrasodium EDTA, Methylparaben, Propylparaben

glöLid primer

INGREDIENTS: PPG-2 Myristyl Ether Propionate, Neopentyl Glycol Dicaprylate/Dicaprate, Ozokerite, Titanium Dioxide (CI 77891), Nylon-12, Kaolin, Tridecyl Trimellitate, Lanolin Oil, Phenoxyethanol, Vegetable Oil, BHT May Contain (+/-): Yellow 5 Lake (CI 19140:1), Iron Oxides (CI 77491, CI 77492)

glöLip plumper

INGREDIENTS: Polybutene, Hydrogenated Polyisobutene, Octyldodecanol, Sodium Chondroitin Sulfate, Atelocollagen, Butylene Glycol, Silica Dimethyl Silylate, Pentaerythrityl Tetraisostearate, Silica Silylate, Tocopherol, Tocopheryl Acetate, Carthamus Tinctorius (Safflower) Seed Oil, Capsicum Frutescens Fruit Extract, Citrus Aurantium Dulcis (Orange) Oil, Phenoxyethanol, May Contain (+/-): Red 6 Lake (CI 15850), Red 7 Lake (CI 15850)

glöLip stick

INGREDIENTS: Ricinus Communis (Castor) Seed Oil, Octyldodecanol, Titanium Dioxide (CI 77891), Myristyl Lactate, Myristyl Alcohol, Euphorbia Cerifera (Candelilla) Wax, Hydrogenated Polydecene, Hydrogenated Castor Oil, Bis Diglyceryl Polyacryladipate-2, Microcrystalline Wax, Copernicia Cerifera (Carnauba) Wax, Cetyl Palmitate, Beeswax, Carthamus Tinctorius (Safflower) Seed Oil, Camellia Oleifera (Green Tea) Leaf Extract, Retinyl Palmitate, Tocopherol, Tocopheryl Acetate, Ascorbyl Palmitate, Phenoxyethanol May Contain (+/-):Mica (CI 77019), Iron Oxides (CI 77491, CI 77492, CI 77499), Red 6 (CI 15850), Red 7 Lake (CI 15850:1), Red 30 Lake (CI73360), Red 27 Lake (CI 45410:1), Yellow 5 Lake (CI 19140:1), Blue 1 Lake (CI 42090:2), Carmine (CI 75470)

glöLiquid eye liner

INGREDIENTS: Water (Aqua), Butylene Glycol, Di-PPG-3 Myristyl Ether Adipate, VP Eicosene Copolymer, Polyglyceryl-4 Isostearate, Cetyl PEG/PPG-10/1 Dimethicone, Hexyl Laurate, Cetearyl Alcohol, Polysorbate 60, Polysorbate 20, Cellulose gum, Xanthan Gum, Triethanolamine, Ozokerite, Tetrasodium EDTA, Phenoxyethanol, Caprylyl Glycol, Ethylhexylglycerin, Hexylene Glycol, May Contain (+/-): Mica, Titanium Dioxide (CI77891), Iron Oxides (CI77491, CI77492, CI77499), Carmine (CI75470), Ultramarines (CI77007), Manganese Violet (CI77742)

glöLiquid lips (precious)

INGREDIENTS: Polybutene, Ethylhexyl Palmitate, Octyldodecanol, Phenoxyethanol, Tocopheryl Acetate, Tocopherol, Carthamus Tinctorius (Safflower) Seed Oil, Aloe Barbadensis Leaf Extract, Camellia Oleifera (Green Tea) Leaf Extract, Retinyl Palmitate

glöLiquid lips (all colors)

INGREDIENTS: Polybutene, Helianthus Annuus(Sunflower) Seed Oil, Octyldodecanol, Titanium Dioxide (CI 77891), Euphorbia Cerifera (Candelilla) Wax, Copernicia Cerifera (Carnauba) Wax, Ricinus Communis (Castor) Seed Oil, Calcium Aluminum Borosilicate Silica, Silica, Calcium Sodium Borosilicate, Trihydroxystearin, Bumetizole, Phenoxyethanol, Flavor, Ammonium Glycyrrhizinate, Carthamus Tinctorius (Safflower) Seed Oil, Aloe Barbadensis Leaf Extract, Camellia Oleifera (Green Tea) Leaf Extract, Retinyl Palmitate, Tocopherol, Tocopheryl Acetate, Ascorbyl Palmitate, May Contain (+/-): Mica (CI 77019), Iron Oxides (CI 77491, CI 77492, CI 77499), Red 7 Lake (CI 15850:1), Red 27 Lake (CI 45410), Yellow 5 Lake (CI 19140), Carmine (CI 75470), Red 6 (CI 15850), Blue 1 Lake (CI 42090:2), Red 30 Lake (CI 73360)

glöLoose base

INGREDIENTS: Mica, Lauroyl Lysine, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Phenoxyethanol, Tocopherol, Ascorbyl Palmitate, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Caprylyl Glycol, Isopentylidiol, Water, May Contain (+/-): Bismuth Oxychloride (CI 77163), Iron Oxides (CI 77491, CI 77492, CI 77499), Zinc Oxide (CI 77947)

glöLoose eye shadow

INGREDIENTS: Mica, Titanium Dioxide (CI 77891), Sodium Dehydroacetate, Retinyl Palmitate, Tocopheryl Acetate, Ascorbic Acid, Butylene Glycol, Water, Camellia Oleifera Leaf Extract, Phenoxyethanol, May Contain (+/-) : Bismuth Oxychloride (CI 77163), Ultramarines (CI 77007), Iron Oxides (CI 77491, CI 77492, CI 77499), Carmine (CI 75470)

glöMatte finishing powder

INGREDIENTS: Mica, Oryza Sativa (Rice) Starch, Zinc Stearate, Titanium Dioxide (CI 77891), Octyldodecyl Stearoyl Stearate, Phenoxyethanol, Caprylyl Glycol, Isopentylidiol, Tocopherol, Retinyl Palmitate, Camellia Sinensis Leaf Extract, Ascorbyl Palmitate, Water, May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499)

glöMint balm

INGREDIENTS: Octyl Methoxycinnamate (7.5%), Oxybenzone (3%), Aloe Barbadosensis Leaf Extract, Beeswax / Cera Alba, Cannabis Sativa Seed Oil, Euphorbia Cerifera (Candelilla) Wax / Candelilla Cera, Glycine Soja (Soybean) Oil, Helianthus Annuus (Sunflower) Seed Oil, Limnanthes Alba (Meadowfoam) Seed Oil, Mangifera Indica (Mango) Seed Butter, Mentha Piperita (Peppermint) Oil, Rosmarinus Officinalis (Rosemary) Leaf Extract, Simmondsia Chinensis (Jojoba) Seed Oil, Tocopherol

glöMoist hydration mist

INGREDIENTS: Water (Aqua), Diazolidinyl Urea, Iodopropynyl Butylcarbamate, Allantoin, Chamomilla Recutita (Matricaria) Flower/Leaf Extract, Commiphora Myrrha Resin Extract, Oleth-10, Arctium Lappa Root Extract, Arginine PCA, Tetrasodium EDTA, Hyaluronic Acid, Fructose, Pelargonium Graveolens Flower Oil, Butyrospermum Parkil (Shea Butter)

glöMoist lip treatment

INGREDIENTS: Gossypium Herbaceum (Cotton) Seed Oil, Helianthus Annuus (Sunflower) Oil, Ozokerite, Persea Gratissima (Avocado) Oil, Prunus Amygdalus Dulcis (Sweet Almond) Oil, Butyrospermum Parkil (Shea Butter), Tocopherol, Camellia Sinensis Leaf Extract, Ascorbyl Palmitate, Retinyl Palmitate, BHT, Vegetable Oil/Olus, Ammonium Glycyrrhizinate, Propylparaben

glöPerfecting powder

INGREDIENTS: Mica, Aluminum Starch Octenylsuccinate, Nylon-12, Zinc Stearate, Lauroyl Lysine, Magnesium Myristate, Kaolin, Octyldodecyl Stearoyl Stearate, Phenoxyethanol, Tocopherol, Ascorbyl Palmitate, Isopentylidiol, Caprylyl Glycol, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Water, May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499)

glöPrecision brow pencil

INGREDIENTS: Polymethyl Methacrylate, Diethylhexyl Sodium Sulfosuccinate, Dimethylimidazolidinone Rice Starch, Titanium Dioxide (CI 77891) Distarch Phosphate, Magnesium Aluminum Silicate, PEG-4 Maontanate, Silica, Hydroxypropyl Cyclodextrin, Ethylene/Methacrylate Copolymer, Isopropyl Titanium Triisostearate, Sodium Methylparaben, Sodium Propylparaben, Imidazolidinyl Urea, May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499), Mica, Bismuth Oxychloride (CI 77163)

glöPrecision eye pencil

INGREDIENTS: Hydrogenated Palm Kernel Glycerides, Hydrogenated Vegetable oil, Caprylic/Capric Triglyceride, Titanium Dioxide (CI 77891), Hydrogenated Palm Glycerides, Rhus Succedanea Fruit Wax, Tocopherol, Retinyl Palmitate, Ascorbyl Palmitate, May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499), Ultramarines (CI 77007) Ferric Ferrocyanide (CI 77510), Mica (CI 77019), Carmine (CI 75470), Zinc Oxide (CI 77947)

glöPrecision lip pencil

INGREDIENTS: Cyclopentasiloxane, Paraffin, C11-12 Isoparaffin, Titanium Dioxide (CI 77891), Polybutene, Hydrogenated Cottonseed Oil, Simmondsia Chinensis (Jojoba) Seed Extract, Ceresin, Ozokerite, Microcrystalline Wax / Cera Microcristallina, Tocopherol, Retinyl Palmitate, Ascorbyl Palmitate, May Contain (+/-): Mica, Iron Oxides (CI 77491, CI 77492, CI 77499), Red 7 Lake (CI 15850), Manganese Violet (CI 77742), Bismuth Oxychloride (CI 77163), Blue 1 Lake (CI 42090), Carmine (CI 75470), Zinc Oxide (CI 77947)

glöPressed base

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Boron Nitride, Zinc Oxide, Nylon – 12, Phenoxyethanol, Tocopherol, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentylidiol, Water May Contain (+/-): Bismuth Oxychloride (CI 77163), Iron Oxides (CI 77491, CI 77492, CI 77499), Ultramarines (CI 77007), Chromium Oxide Greens (CI 77288), Carmine (CI 75470)

glöPressed base (chestnut light)

INGREDIENTS: Mica, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Zinc Stearate, Boron Nitride, Phenoxyethanol, Tocopherol, Camellia Sinensis Leaf Extract, Retinyl Palmitate, Ascorbyl Palmitate, Caprylyl Glycol, Isopentylidiol, Water May Contain (+/-): Bismuth Oxychloride (CI 77163), Iron Oxides (CI 77491, CI 77492, CI 77499), Ultramarines (CI 77007), Chromium Oxide Greens (CI 77288), Carmine (CI 75470), Yellow 5 Lake (CI 19140:1), Zinc Oxide (CI 77947)

glöProtective liquid foundation - matte II

INGREDIENTS: Water, Caprylic/Capric Triglyceride, Butylene Glycol, Titanium Dioxide (CI 77891), Kaolin, Dimethicone, Glycerin, Glyceryl Stearate, PEG-100 Stearate, Polysorbate 20, Stearic Acid, Corn Starch Modified, Thermus Thermophilus Ferment, Sorbitan Stearate, Cetyl Alcohol, Cyclopentasiloxane, Cyclohexasiloxane, Triethanolamine, Malachite Extract, Lecithin, Magnesium Aluminum Silicate, Xanthan Gum, Cellulose Gum, PEG-12 Dimethicone, Panthenol, Disodium EDTA, Camellia Sinensis (Green Tea) Leaf Extract, Ginkgo Biloba Extract, Chamomilla Recutita (Matricaria) Flower Extract, Aloe Barbadensis (Aloe Vera) Leaf Extract, Cucumis Sativus (Cucumber) Fruit Extract, Phenoxyethanol, Caprylyl Glycol, Ethylhexylglycerin, Hexylene Glycol, Fragrance May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499)

glöProtective liquid foundation - satin II

INGREDIENTS: Water, Cyclopentasiloxane, Phenyl Trimethicone, Titanium Dioxide (CI 77891), Cyclopentasiloxane, PEG/PPG-18/18 Dimethicone, Dimethicone/Vinyl Dimethicone Crosspolymer, Glycerin, Cyclomethicone, Propylene Carbonate, Distearidimonium Hectorite, Lauryl PEG/PPG-18/18 Methicone, Malachite Extract, Sodium Chloride, Silica, Polyglyceryl-4 Isostearate, Cetyl PEG/PPG-10/1 Dimethicone, Hexyl Laurate, Methicone, Tocopheryl Acetate, Carthamus Tinctorius (Safflower) Seed Oil, Retinyl Palmitate, Ascorbyl Palmitate, Aloe Barbadensis (Aloe Vera) Leaf Extract, Lavandula Angustifolia (Lavender) Extract, Chamomilla Recutita (Matricaria) Flower Extract, Camellia Oleifera (Green Tea) Leaf Extract, Phenoxyethanol, Ethylhexylglycerin May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499)

glöReflection cream eye shadow

INGREDIENTS: Water, Butylene Glycol, Di-PPG-3 Myristyl Ether Adipate, Titanium Dioxide (CI 77891), Silica, VP/Eicosene Copolymer, Polysorbate 20, Cetearyl Alcohol, Polysorbate 60, Cellulose Gum, Xanthan Gum, Ozokerite, Polyglyceryl-4, Cetyl PEG/PPG-10/1 Dimethicone Isostearate, Hexyl Laurate, Disodium EDTA, Allantoin, Phenoxyethanol, Caprylyl Glycol, Ethylhexylglycerin, Hexylene Glycol, May Contain (+/-): Mica (CI 77015), Iron Oxides (CI 77491, CI 77499), Ultramarines (CI 77007), Carmine (CI 75470)

glöSheer lip stick

INGREDIENTS: Pentaerythrityl Tetraisostearate, Simmondsia Chinensis (Jojoba) Seed Oil, Ethylene/Propylene/Styrene Copolymer, Butylene/Ethylene/Styrene Copolymer, Hydrogenated Polyisobutene, Ricinus Communis (Castor) Seed Oil, Kaolin, Polyisobutene, Polyethylene, Euphorbia Cerifera (Candelilla) Wax/Candelilla Cera, Ethylhexyl Methoxycinnamate, Ethylhexyl Palmitate, Beeswax/Cera Alba, Ozokerite, Phenoxyethanol, Luffa Cylindrica Seed Oil, Ethyl Vanillin, Sodium Benzoate, Retinyl Palmitate, Tocopheryl Acetate, Ascorbic Acid, Camellia Sinensis Leaf Extract, Titanium Dioxide (CI 77891), Red 7 Lake (CI 15850:1), Iron Oxides (CI 77491, CI 77492) May Contain (+/-): Mica, Calcium Aluminum Borosilicate, Silica, Yellow 5 Lake (CI 19140), Carmine (CI 75470), Red 6 Lake (CI 15850:2), Tin Oxide

glöSheer tint

INGREDIENTS: Water (Aqua), Dimethicone, Cetyl Dimethicone, Titanium Dioxide (CI 77891), Isopropyl Myristate, Cyclopentasiloxane, Glycerin, Stearic Acid, Polysorbate 20, Polyglyceryl-3 Diisostearate, Cetearyl Alcohol, Ceteareth-6, Stearyl Alcohol, Ceteareth-20, Triethanolamine, PEG/PPG-20/15 Dimethicone, Magnesium Aluminum Silicate, Phenoxyethanol, Potassium Sorbate, Caprylyl Glycol, Xanthan Gum, Sodium Dehydroacetate, Ethylhexyl Glycerin, Hexylene Glycol, Retinyl Palmitate, Tocopheryl Acetate, Ascorbic Acid, Butylene Glycol, Camellia Oleifera Leaf Extract, Iron Oxides (CI 77491, CI 77492, CI 77499), Mica (CI 77019)

glöShimmer brick

INGREDIENTS: Mica, Zinc Stearate, Octyldodecyl Stearoyl Stearate, Titanium Dioxide (CI 77891), Boron Nitride, Tocopherol, Lauroyl Lysine, Retinyl Palmitate, Camellia Sinensis (Green Tea) Leaf Extract, Water, Ascorbyl Palmitate, Phenoxyethanol, Caprylyl Glycol, Isopentyl diol May Contain (+/-): Iron Oxides (CI 77491, CI 77492, CI 77499), Carmine (CI 75470)

glöVolumizing mascara

INGREDIENTS: Water (Aqua), Beeswax (Cera Alba), Copernicia Cerifera (Carnauba) Wax / Cera Carnauba, Cyclomethicone, PVP, Stearic Acid, Propylene Glycol Stearate, Glyceryl Stearate, Sorbitan Stearate, Triethanolamine, Polybutene, Oleic Acid, Nylon-6, Silica, Cellulose Gum, Magnesium Aluminum Silicate, Camellia Sinensis Leaf Extract, Tocopherol, Ascorbyl Palmitate, Retinyl Palmitate, Panthenol, Simethicone, Tetrasodium EDTA, Methylparaben, Propylparaben, Chlorphenesin, May Contain (+/-): Iron Oxides (CI 77491), Iron Oxides (CI 77492), Iron Oxides (CI 77499)

ingredient glossary

24 Karat Gold Leaf: Used as a coloring and to give shine to cosmetics.

Acacia Senegal: Gum-used for product thickening.

Acrylates Copolymer: A film-former and thickener.

Acrylates / Vinyl Isodecanoate Crosspolymer: A thickening agent.

Actinidia Chinensis (Kiwi) Seed Oil: Used for its emollient and skin conditioning properties.

Aleurites Moluccana (Kukui Nut) Seed Oil: Used for its emollient and skin conditioning properties.

Allantoin: Used in cosmetic products for its ability to help heal and to sooth afflicted skin, suitable for sensitive irritated and acneic skin.

Aloe Barbadosis Leaf Extract (Aloe Vera): A compound derived from the leaf of the aloe plant. Used for its skin softening, soothing.

Aluminum Starch Octenylsuccinate (Dry Flow): An absorbent anti-caking and thickening ingredient, which helps to absorb excess oil production.

Ammonium Glycyrrhizate: The ammonium salt of glycyrrhizic acid. Used as a base in lotions and moisturizers. Also used as a flavoring agent.

Anthemis Nobilis Flower Oil (Chamomile Oil): Oil from the Chamomile flower is an anti-inflammatory, anti-bacterial, skin-soothing ingredient. Also used as a coloring or flavoring ingredient depending on the flower variety.

Arctium Lappa (Burdock Root Extract): Extract from the roots, leaves and seeds of the plant. Used to soothe the skin especially acneic skin because of its anti-bacterial properties.

Arginine PCA: An essential amino acid, which in cosmetic preparations increases skins ability to received moisture.

Ascorbic Acid (vitamin C): A preservative and antioxidant widely used to reverse free-radical damage and strengthen immune response to antigens.

Ascorbyl Palmitate: A salt of ascorbic acid (vitamin C). It is used as both a preservative and antioxidant.

Atelocollagen: A component of Marine Filling Spheres, which create a plumping effect.

Bee Pollen Extract: A derivative of bee pollen; a natural compound containing 19 amino acids, up to 35% protein, 12 vitamins, calcium, phosphorus, magnesium, iron, copper, manganese, sodium, potassium, chlorine and sulfur.

Beeswax: A commonly used wax, harvested from virgin bees, used primarily as an emulsifier. Beeswax, which has two forms -- yellow and white, has excellent water-resistant properties.

Behenyl Alcohol: A binder and an emulsion stabilizer.

Bismuth Oxychloride: Used as a cosmetic colorant especially to give a bright metallic luster and is also used as a skin protectant.

BHT (Butylated Hydroxytoluene): A preservative and antioxidant.

Bis-Diglyceryl Polyacyladipate-2: A gel made from stearic acid and adipic acid used as a glossy emollient.

Boron Nitride: A compound found in the earth's crust. Used as an antiseptic.

Bumetrizole (Phenol): An absorbent, which helps to prevent color from fading in sunlight.

Butyl Ester of PVM / MA Copolymer: Synthetic resin used in lipsticks.

Butylene / Ethylene / Styrene Copolymer: Used as a thickening ingredient, increases viscosity.

Butylene Glycol: Used as an emulsifier.

Butylparaben: A commonly used preservative used to inhibit antimicrobial activity.

C18-38 Alkyl Hydroxystearoyl Stearate: Used as an emulsion stabilizer and to increase viscosity.

Camellia Oleifera Leaf Extract: A healing botanical, antioxidant.

Camellia Sinensis (Green tea) Leaf Extract: A anti-inflammatory and antioxidant.

Candellia Wax: Binds oils and waxes while giving volume to formulations.

Caprylic / Capric Triglyceride: Emollient that promotes product penetration.

Caprylyl Glycol: An emollient that conditions the skin.

Capsicum Frutescens Fruit Extract: Creates a tingling sensation.

Carbolic Acid: A disinfectant.

Carbomer: Used as a thickening, suspending, dispersing and emulsifying ingredient.

Carbopol: See carbomer.

Carmine: An organic pigment (classified as an aluminum lake) derived from beetles, which gives crimson pigment.

Carnauba Wax: Used to firm and texturize cosmetic preparations and provide a less fluid consistency. Also forms a protective layer on the skin's surface.

Carthamus Tinctorius (Safflower) Seed Oil: Extracted from an Old World herb that has bright red or orange flowers and resembles a thistle. Used in creams and lotions to soften the skin.

Caviar Extract: This extremely concentrated oil-free ingredient delivers essential fatty acids and a rich vitamin blend, including vitamins A, D, E, B1, B2 and B6 to protect and nourish skin. Used to revitalize oily, mature and dehydrated skin.

Cellulose Gum: A thickener and an emulsifier. It is resistant to bacterial decomposition and provides the product with uniform viscosity.

Ceresin: Known as Earth Wax found in Ukraine, Utah and Texas most commonly used as an emollient in a similar manner as beeswax.

Ceteareth-6: Used to improve the spreading properties of the product.

Ceteareth-20: Used as a cleaning agent as well as solubilizing agent.

Cetearyl Alcohol: An emulsifying and stabilizing wax, from plant oils and natural waxes. Also gives high viscosity to a finished product.

Cetyl Alcohol: An emollient, emulsifier and thickening agent.

Cetyl Ethylhexanoate: An emollient and skin conditioner.

Cetyl Palmitate: Thickening agent that also adds texture.

Cetyl PEG / PPG-10 / 1 Dimethicone: Emulsifying agent.

Chamomilla Recutita (Matricaria) Flower Extract: Wild chamomile extract. Used externally as a soothing medication for inflammation.

Chlorphenesin: An alcohol used as an antiseptic.

Chromium Oxide Green: A color additive.

Citral: An aroma compound used as a fragrance.

Citric Acid: Used to regulate acidity of a product. Also may be used as a fragrance.

Citrus Aurantium Dulcis (Orange) Oil: Used as a fragrance.

Citrus Grandis (Grapefruit) Extract: The extract from the seeds of the grapefruit. It's used as a preservative, a sequestering ingredient, a foam inhibitor, a plasticizer, an astringent, a skin freshener and an antioxidant.

Citrus Sinensis (Orange Flower) Extract: Sweet orange oil. Used as a fragrance and flavor.

Cola Acuminata Seed Extract: Kola nut extract. A natural extract containing caffeine. Used for the skin stimulating effects of the alkaloids, caffeine and theobromine in the kola nut.

Commiphora Myrrha (Myrrh) Extract: Myrrh gum. The resin from the plant is used as an antiseptic and skin stimulant.

Copernica Cerifera Wax: Firming and texturizing agent for cosmetic preparation. It also forms a protective layer on the skin's surface.

Copolymer: Two or more polymers combined together.

Cucumis Sativis (Cucumber Fruit Extract): Acts with emulsions to tighten stressed skin.

Cyclohexasiloxane: A skin conditioning agent.

Cyclomethicone: A widely used silicone. Silicones are popular bases in makeup formulation as they provide water-resistance, lubrication and skin adhering properties.

Cyclopentasiloxane: An emollient.

C11-12 Isoparaffin: A skin conditioner.

C12-15 Alkyl Benzoate: A fatty acid used as an emulsifier, binder or lubricant.

C13-14 Isoparaffin: A widely used solvent.

Diazolidnyl Urea: An antiseptic and deodorizer.

Dicaprylate / Dicaprate Tricaprylin: A vegetable derived antisepting agent / lubricant.

Diethylhexyl Sodium Sulfosuccinate: Used as an antiseptic, buffer and neutralizing agent.

Dihydroxyacetone: A colorant with skin conditioning properties used for its effectiveness in sunless tanning.

Dimethicone: Silicone oil used commonly as an ointment-based ingredient and as a skin protector.

Dimethicone Crosspolymer-3: Skin-conditioning agent, which gives a silky feel to the product. It also protects skin against water loss.

Disodium EDTA: Used as a stabilizer.

Distarch Phosphate: A water softener, sequestering ingredient and texturizer.

Disteardimonium Hectorite: Suspending agent with pigment.

Emulsifying Wax: Wax that is treated to mix more easily into the formulation.

Erythrulose: A colorant used for its effectiveness in sunless tanning.

Ethylene / Propylene / Styrene Copolymer: Used as a thickening ingredient, increases viscosity.

Ethylhexylglycerin: Has deodorizing and skin conditioning properties.

Ethylhexyl Palmitate: An emollient derived from various organic materials used primarily as a texturizer.

Ethylhexyl Methoxycinnamate: UV absorber in suntan preparations.

Ethylhexyl Salicylates: A salt of salicylic acid. The salts are used as sunburn preventatives and antiseptics.

Ethyl Vanillin: Used to create a pleasant delicate flavor in lip products, gives a stronger flavor than vanilla extract.

Ethylparaben: A preservative with minimal sensitizing potential.

Euphorbia cerifera (Candelilla) Wax: A firming and texturizing ingredient. Used to thicken consistency.

Ferric Ferrocyanide (Iron Blue): An inorganic salt used as a dark blue coloring for cosmetics.

Fragrance: Any natural or synthetic substance or substances used solely to give smell to the given product.

Fructose: A sugar occurring naturally in a large number of fruits and in honey.

Gaultheria Procumbens (Wintergreen) Leaf Extract: Used as a fragrance and flavor.

Geranium Maculatum Oil: Used as a fragrance.

Ginko Biloba Leaf Extract: Used as a skin conditioner and anti-inflammatory.

Glucosamine Sulfate: A pH adjuster.

Glycerin: A solvent, humectant and emollient. Used for its water absorbing and retaining properties.

Glyceryl Sterate: Emulsifier.

Glycol Stearate: One of the most widely used bases for makeup. An emollient, opacifying ingredient and emulsifier.

Gossypium (Cotton) Seed Oil: Used as a lubricant.

Hexyl Laurate: Used as an emulsifier.

Hexylene Glycol: Most often used as fragrance and to decrease viscosity of a product.

Hyaluronic Acid: A sugar compound present in all connective tissue in vertebrates. The acid binds to water and provides volume.

Hydrogenated Castor Oil: A highly emollient carrier oil that penetrates the skin easily leaving it soft and supple. It also acts as a binder of different ingredients in a cosmetic formulation.

Hydrogenated Coco Glyceride: An emollient that makes the skin feel softer and more pliable. Offers a hydrating effect by reducing moisture evaporation from the skin.

Hydrogenated Palm Kernel: Skin conditioning agent.

Hydrogenated Polydecene: Skin conditioning and viscosity-controlling agent.

Hydrogenated Polyisobutene: A widely used emollient and skin conditioner.

Hydrogenated Vegetable Glycerides: Emollient.

Hydroxyethyl Acrylate / Sodium: Thickener.

Hydroxyethyl Acrylate / Sodium Acryloyldimethyl Taurate Copolymer: Used as an emulsion stabilizer and thickener.

Hydroxyethylcellulose: Used as a binding agent and thickener.

Hydroxypropyl Cyclodextrin: An absorbent and chelating ingredient.

Imidazolidinyl Urea: One of the most commonly used antibacterial preservatives.

Iodopropynyl Butylcarbamate: A preservative with broad fungicidal activity for use in skin care products. It is recommended for use in a difficult formulation system.

Iron Oxide: Inorganic compound that adds color and offers some sun protection.

Isododecane: An emollient.

Isohexadecane: An emulsifier and thickening agent.

Isopropyl Isostearate: An emollient that leaves skin with a smooth finish.

Isopropyl Jojobate: A skin conditioner and emollient.

Isopropyl Myristate: A skin conditioner.

Isopropylparaben, Isobutylparaben: Commonly used preservatives. These parabens are used to inhibit microbial activity.

Isopropyl Palmitate: Used as a binder, skin-conditioning ingredient and emollient.

Isopropyl Titanium Triisostearate: A skin conditioner.

Japan Wax: A binding wax derived from a fruit.

Jojoba Esters: A skin conditioner and emollient.

Jojoba Wax: Hydrogenated jojoba oil -- a moisturizer and emollient.

Kaolin: China clay aids in the covering ability of face powder and in absorbing excess oil secreted by the skin.

Lake colors: (Red 6 Lake, Red 7 Lake, Red 27 Lake, Yellow 5 Lake, Blue 1 Lake, Red 30 Lake) Organic pigments that have been treated to make them insoluble.

Lanolin Oil (Wool Wax): Produced by the oil glands of sheep, it is a natural emulsifier and is exceptionally water resistant. Can cause skin irritation to those with animal allergies.

Laureth-7 (1-30): An amphoteric surfactant, this ingredient facilitates water absorption and neutralization.

Lauroyl Lysine: A makeup base most commonly used in blush and lipstick.

Lauryl PEG / PPG-18-18 Methicone: An emulsifying agent.

Lavendula Angustifolia (Lavender) Extract: Lavender oil. Used as a fragrance and flavor.

Lecithin: An emollient, emulsifier, antioxidant and spreading agent.

Limnanthes Alba (Meadowfoam) Seed Oil: Used for its emollient and skin conditioning properties.

Limonene: Used as a fragrance.

Linalool: Used as a fragrance.

Luffa cylindrica Seed Oil: A skin conditioner.

Macrocystis Pyriferae (Sea Kelp) Extract: Used to regulate the texture of the skin. Possible anti-inflammatory.

Magnesium Aluminum Silicate: Thickener with texture modification and emulsion stabilizing abilities. Also contains astringent qualities.

Magnesium Aluminium Stearate: A silver white malleable metal that is widely used in combination with various chemicals as a thickener.

Magnesium Myristate: The magnesium salt of myristic acid, a solid organic acid that occurs naturally in butter acids (Example: palm oil and coconut butter).

Malachite: A hydrated copper carbonate. Antioxidant that acts directly on the troublemaker.

Manganese Violet: A violet color. Manganese plays a role in collagen synthesis and skin moisturization.

Methylparaben: One of the most frequently used preservatives because of its very low sensitizing potential. Non-comedogenic.

Mica (Pearls): Minerals that have formed in crystallized, thin, elastic sheets that can be separated easily. Ground, they are used as colorants and lubricants to add sheen to products.

Microcrystalline Wax: An emulsifier and beeswax substitute characterized by the fineness of its crystals.

Myristyl Lactate: A widely used emollient.

Neopentyl Glycol Dicaprylate/Dicaprate: The esters of neopentyl glycol and caprylic, pelargonic and capric acids. Used in bases of creams and lotions.

Nylon-6: A synthetic fiber used as a thickener and opacifier.

Nylon-12: A bulking and opacifying agent that provides elasticity to makeup.

Octyldodecanol: A widely used emollient for makeup bases. Has skin conditioning properties.

Octyldodecyl Stearoyl Stearate: A skin conditioning ingredient used in a number of cosmetic products.

Oleic Acid: A product obtained from various plant and animal fats and oils. Used for its skin penetrating properties.

Oleth-10: A naturally derived oily liquid used as an antifoam ingredient.

Oryza Sativa: Finely pounded grains of rice. A demulcent and emollient.

Ozokerite: A mineral wax used as an emulsifier and thickening agent.

Panthenol (Dexapanthenol): Vitamin B. Benefits human tissues.

Paraffin: A very common cosmetic ingredient used as an emollient.

PEG-4 Montanate: A waxy compound, used as a substitute for carnauba and beeswax. Used as a thickener and binder in lipsticks and foundations.

PEG-75 Lanolin: Derivative of wool wax. An emulsifier and water retainer.

PEG-100 Stearate: A widely used emulsifying agent.

PEG-150: An emulsifier.

PEG / PPG-20 / 15 Dimethicone: Used as an emulsifier.

Pentaerythrityl Tetraisostearate: A naturally derived oil. Used as thickening agent, an emulsifier or lubricant.

Persea Gratissima (Avocado) Oil: An emollient used for its high fat and vitamin A and C components.

Phenyl Trimethicone: A skin conditioner.

Phenoxyethanol: An oily liquid with a faint aromatic odor used as a preservative to guard against the growth of bacteria and mold.

Phytosteryl Oleate: Plant fatty alcohol. Used for its skin penetrating properties.

Polyacrylamide: Used in makeup bases as a thickening ingredient.

Polybutene: A plasticizer obtained from petroleum oils. Used as a lubricant.

Polydimethyl Siloxane: A silicone. Used for its water retaining and skin smoothing properties.

Polyethylene: Used to achieve a specific product consistency.

Polyglyceryl-3 Diisostearate: Used as an emulsifier and to allow for spreadable consistency.

Polyglyceryl-4 Isostearate: An ester of stearic acid and glycerin. A fatty acid used as a solvent, humectant and emollient.

Polyglyceryl-10 Pentastearate: An emulsifying agent.

Polyisobutene: See polybutene.

Polymethyl Methacrylate: A film former used in cream and powder bases.

Polysorbate 20: Improves solubility, softens skin, and stabilizes oil in aqueous solutions.

Polysorbate 60: An emulsifier and stabilizer.

Polysorbate 80: An oil-in-water emulsifier.

Potassium Sorbate: A preservative with fragrance benefits.

PEG / PPG-18 / 18 Dimethicone: An emollient and skin protectant.

PPG-2 Myristyl Ether Propionate: An emollient used in creams to give a smooth velvety feel.

Propylparaben: One of the most frequently used preservatives protecting against bacteria and mold. Considered a non-comedogenic raw material.

Propylene Carbonate: A colorless liquid used as a solvent and plasticizer.

Propylene Glycol: A clear, viscous liquid. Used as a moisture-carrying vehicle in lieu of water.

Propylene Glycol Stearate: Most common moisture-carrying vehicle. Also a solvent for antioxidants and preservatives. It is an emulsifier and thickening agent.

PVP: Found in waterproofing mascaras to improve wear. Provides water and wear resistance while dispersing pigment.

Quaternium-18 Hectorite: A suspending agent.

Retinyl Palmitate (vitamin A): A skin-conditioning agent and antioxidant that helps skin stay soft and plump.

Prunus Amygdalus (Almond) Oil: Serves as an emollient and a carrier providing an elegant feel to the skin and promotes spreadability.

Rice starch: Emollient. Forms a soothing protective film when applied.

Ricinus Communis (Castor) Seed Oil: A highly emollient carrier oil that penetrates the skin easily leaving it soft and supple. Also serves as a binder.

Rosmarinus Officinalis (Rosemary) Leaf Oil: Has antiseptic properties. It is beneficial for acne, dermatitis and eczema.

Salicylic Acid: Used externally as an antiseptic, fungicide, antimicrobial and skin sloughing ingredient.

SD Alcohol 40 B: Denatured ethyl alcohol. Used as thickeners, solidifiers, liquefiers, solvents and astringents.

Shea Butter: Protects the skin from dehydration and other climatic influences.

Shellac: The refined form of lacca. Used as a binding agent in cosmetics.

Silica: White powder that occurs abundantly in nature. It is used as an absorbent and is favored in skin protective products.

Silica Dimethyl Silylate: Used as a thickening agent.

Silica Silylate: Used to achieve a specific product consistency.

Simethicone: Anti-foaming agent.

Simmondsia chinensis (Jojoba) Seed Oil: An emollient and skin conditioner.

Sodium Acryloyldimethyl Taurate: A copolymer that is half conditioning agent and half binding agent. Used to hold the product together.

Sodium Benzoate: A preservative.

Sodium Chloride: An emulsifying agent.

Sodium Chondroitin Sulfate: A component of Marine Filling Spheres, which create a plumping effect.

Sodium Citrate: Used for its ability to regulate acidity of a product and affect the pH of the skin allowing for better absorption.

Sodium Dehydroacetate: A preservative.

Sodium EDTA (Ethylenediamine Tetraacetic Acid): An important compound in cosmetics used primarily as a sequestering agent.

Sodium PCA: A humectant that has a high moisture-binding ability.

Sodium Stearoyl Lactylate: A calcium salt used as an emulsifier.

Sorbitan Sesquioleate: A Surfactant used as an emulsifying agent.

Sorbitan Stearate: Emulsifier that acts as a solvent for essential oils.

Squalane: Components found in fish oils may reduce skin irritation and allergic responses. An excellent moisturizer and lubricant.

Stearic Acid: Waterproofing agent that is non-irritating to skin. Also an emulsifier and thickening agent.

Stearyl Alcohol: A fatty alcohol used as an emollient and emulsifier.

Stearyl Dimethicone: An emollient.

Stearyl Heptanoate: A non-greasy emollient that produces a high water-repellent film.

Sucrose: Sugar derived from plants.

Sunflower Seed Oil: Commonly used as a carrier oil. Provides smoothing benefits in a non-comedogenic delivery.

Symphytum Officinale Leaf Extract (Comfrey): Used for its purifying qualities as well as its anti-inflammatory and soothing benefits.

Tetrahexyldecyl Ascorbate: A lipid soluble form of vitamin C.

Tetrasodium EDTA: A sequestering and chelating ingredient.

Thermus Thermophilus Ferment: Venuseane antioxidant.

Tin Oxide: A coloring ingredient.

Titanium Dioxide: White, naturally occurring mineral pigment. Widely used for its light deflective and tinting properties along with its aptitude as an opacifier.

Tocopherol Acetate (vitamin E): An antioxidant and skin conditioner. Protects the skin from abnormal breakdown. Derived from edible vegetable oils.

Tocopherol (vitamin E): An antioxidant.

Tribehenin PEG-20 Esters: A thickener and skin conditioning agent that holds the product together.

Tridecyl Trimellitate: Clear crystals derived from coal. Used in the manufacturing of adhesives, dyes and polymers.

Triethanolamine: A dispersing and emulsifying agent.

Trihydroxy stearin: Extracted from cork and used as a thickener.

Trimethylsiloxysilicate: Ester of silicic acid used as an opacifier, which is also soothing to skin.

Trisodium EDTA: See Tetrasodium EDTA.

Tromethamine: Used as an emulsifier and fragrance in cosmetic creams and lotions, mineral oil and paraffin wax emulsions.

Ultramarines: Natural coloring agent safe for the face including the eye area.

Vanillin: An artificial flavoring derived from eugenol and wood pulp.

Vegetable Oil: Peanut, sesame, olive and cottonseed oil obtained from plants.

Venuceane: Biotechnological product obtained from the culture of thermus thermophilus. Called the "smart" antioxidant. Repairs and protects against the damage caused by UVA.

Vitus Vinifera (Grape) Seed Extract: A vegetable oil pressed from the seeds of Vitis Vinifera.

Water (Aqua): The major constituent of all living matter. Water used in cosmetic preparation is sterilized, de-ionized and softened.

Xanthan Gum (Corn Sugar Gum): This gum is produced through fermentation and is widely used as a thickener, an emulsifier and a stabilizer.

Zinc Oxide: Obtained from zinc ore. Used to protect, soothe and heal the skin. Provides an excellent barrier to the sun and other irritants. Has UVA and UVB absorption characteristics.

Zinc Stearate: A mixture of zinc salts of stearic and palmitic acids. Used for its adhesive and water repelling properties and as a colorant.
